**Vendor:**Microsoft

**Exam Code:**70-668

**Exam Name:**PRO: Microsoft SharePoint 2010,
Administrator

**Version:**Demo

**QUESTION 1**

You have a SharePoint Server 2010 Service Pack I (SP1) server farm.

You create a custom site column named SCl.

Users are allowed to enter any value in SCl.

You need to modify the search infrastructure to meet the following requirements:

Users must be able to perform a search that only returns results from content that is contained in a specific shared folder. Users must be able to search for items that have a specific value in SCl.

You need to recommend which SharePoint technology must be implemented to meet the requirements.

What should you recommend? To answer, drag the appropriate technology to the correct requirement in the answer area.

Select and Place:

Correct Answer:

---

**QUESTION 2**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to deploy a site for the sales department and a site for the finance department. You identify the following search requirements for each site:

Content on the finance site must be indexed once daily.

Content on the sales site must be indexed every 15 minutes.

Each site must have independent search keywords and synonyms.

You need to recommend a logical structure to meet the search requirements of each site. What should you recommend?

A. One site collection, two sites, and two search scopes

B. Two sites collections, two sites, and two search scopes

C. Two sites collections, two sites, and two content sources

D. One site collection, two sites, and two content sources

Correct Answer: C

---

**QUESTION 3**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You also have a public site that is hosted on Microsoft SharePoint Online. You need to recommend a search solution to meet the following requirements:

Provide users with the ability to search the SharePoint Online site and SharePoint on- premises simultaneously.

Provide search results from SharePoint Online and SharePoint on-premises in a single Web Part.

What should you include in the recommendation?

A. SharePoint Search Federation

B. a content source

C. search scopes D. a crawl rule

Correct Answer: A

---

**QUESTION 4**

You are the administrator for a company named Fabrikam, Inc.

Fabrikam has an Active Directory forest named fabrikam.com. The forest contains a SharePoint Server 2010 Service Pack 1 (SP1) server farm.

Fabrikam plans to grant users from a company named Contoso, Ltd., access to a web application in the farm.

Contoso has an Active Directory forest named contoso.com. All of the users at Contoso have user accounts in contoso.com.

You need to recommend which configurations must be performed to grant Contoso users access to the web application.

What should you recommend? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

| Actions | Answer Area |
|---|---|
| Modify the authentication providers of the web application. | |
| Install Active Directory Federation Services (AD FS) 2.0 in contoso.com. | |
| Install Active Directory Federation Services (AD FS) 2.0 in fabrikam.com. | |
| Configure a new trusted identity provider for the farm. | |
| Configure a relying party trust in Active Directory Federation Services (AD FS) 2.0. | |
| Set a new Service Principal Name (SPN) on all of the front-end Web servers. | |
| Set a new Service Principal Name (SPN) for Active Directory Federation Services (AD FS) 2.0. | |

Correct Answer:

| Actions | Answer Area |
|---|---|
| | Install Active Directory Federation Services (AD FS) 2.0 in contoso.com. |
| | Configure a relying party trust in Active Directory Federation Services (AD FS) 2.0. |
| Install Active Directory Federation Services (AD FS) 2.0 in fabrikam.com. | Configure a new trusted identity provider for the farm. |
| | Modify the authentication providers of the web application. |
| Set a new Service Principal Name (SPN) on all of the front-end Web servers. | |
| Set a new Service Principal Name (SPN) for Active Directory Federation Services (AD FS) 2.0. | |

**QUESTION 5**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. You plan to create document repository sites for the sales department and the marketing department.

You identify the following requirements:

Files that are larger than 5 MB and are uploaded by users in the sales department must be stored in Remote BLOB Storage (RBS). All others files uploaded by the sales users must be stored in a Microsoft SQL Server database. All files uploaded by users in the marketing department must be stored in a SQL Server database.

You need to recommend the minimum number of web applications, site collections, and content databases that must be created to meet the requirements. What should you recommend?

A. Two web applications and two site collections in two content databases

B. One web application and two site collections in one content database

C. One web application and one site collection in one content database

D. One web application and two site collections in two content databases

Correct Answer: D

---

**QUESTION 6**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

WebApp1 is used by the finance department and uses the URL http://finance.contoso.com. WebApp2 is used by the marketing department and uses the URL http://marketing.contoso.com.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You need to simulate concurrent user connections to the internal farm.

What should you include in the recommendation?

A. Network Load Balancing (NLB)

B. alternate access mappings

C. Information Rights Management (IRM)

D. user policies

E. SharePoint Health Analyzer

F. Remote BLOB Storage (RBS)

G. an ASP.NET Membership Database

H. the Access Services service application

I. Network Access Protection (NAP)

J. the Secure Store Service service application

K. Microsoft Visual Studio 2010

L. cross-firewall access zones

M. managed accounts

N. Active Directory Federation Services (AD FS)

O. a BLOB cache

P. service application groups

Correct Answer: K

---

**QUESTION 7**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm. The farm contains three servers named WFE1, WFE2, and APP1.

User requests are load balanced by using a hardware load balancer.

The farm contains a Business Data Connectivity Service service application. The service application is configured to run on APP1. You plan to add a new server named APP2 to the farm.

You need to ensure that all requests to the Business Data Connectivity Service service application are load balanced between APP1 and APP2.

What should you do?

A. Create a new Business Data Connectivity Service service application.

B. Install Network Load Balancing (NLB) on APP2.

C. Publish the Business Data Connectivity Service service application.

D. Start the Business Data Connectivity Service service application on APP2.

E. Add APP1 and APP2 to the hardware load balancer.

Correct Answer: D

---

**QUESTION 8**

You are a SharePoint administrator for Contoso, Ltd.

The company has 2,000 employees and 500 external users who work at the offices of various partner companies.

You plan to deploy SharePoint Server 2010 to host an intranet Web site, an extranet Web site, and a public Web site for the company.

During capacity testing, you discover that InfoPath user sessions are forcibly terminated, resulting in the loss of form data.

You need to recommend a solution to support the required number of connections for InfoPath Forms Services.

What should you recommend?

A. Distribute InfoPath forms in multiple form libraries.

B. Configure page output caching.

C. Create a new Secure Store Service application.

D. Add a State Service database.

Correct Answer: D

---

**QUESTION 9**

You are designing a SharePoint Server 2010 Service Pack 1 (SP1) server farm. Corporate security policy states that only required ports must be open on servers.

You need to identify which communication ports must be open for the following operations:

Crawling SMB file shares

Accessing data from Microsoft SQL Server content databases Communicating between front-end Web servers and application servers.

Which ports should you identify? To answer, drag the appropriate port to the correct operation in the answer area.

Select and Place:

Correct Answer:

| Ports | | | Answer Area | |
|---|---|---|---|---|
| 25 | 389 | | 445 | Crawling SMB file shares |
| | | | 1433 | Accessing data from Microsoft SQL Server content databases |
| | | | 32843 | Communicating between front-end Web servers and application servers |

**QUESTION 10**

Your company uses Microsoft SharePoint Online and SharePoint Server 2010 Service Pack (SP1) on-premises.

The corporate usage policy states that SharePoint Online must be used whenever possible. You plan to implement three sites named Site1, Site2, and Site3.

The sites have the following requirements:

The users of Site1 must be able to create PerformancePoint dashboards,

The users of Site2 must be able to classify documents by using a taxonomy built by using the Term Store feature.

The developers of Site3 must be able to deploy custom sandbox Web Parts and Microsoft SharePoint Designer workflows to Site3.

You need to recommend in which SharePoint environment to create each site.

What should you recommend? To answer, drag the appropriate environment to the correct site in the answer area.

Select and Place:

| SharePoint Environments | Answer Area | |
|---|---|---|
| SharePoint on-premises | Environment | The users of Site1 must be able to create PerformancePoint dashboards. |
| SharePoint Online | Environment | The users of Site2 must be able to classify documents by using a taxonomy built by using the Term Store feature. |
| | Environment | The developers of Site3 must be able to deploy custom sandbox Web Parts and Microsoft SharePoint Designer workflows to Site3. |

Select and Place:

Correct Answer:

---

**QUESTION 11**

You have a SharePoint Server 2010 Service Pack 1 (SP1) server farm that hosts intranet sites for internal users.

The farm uses Active Directory for authentication.

The farm contains two web applications named WebApp1 and WebApp2 that have the following configurations:

WebApp1 is used by the finance department and uses the URL http://finance.contoso.com. WebApp2 is used by the marketing department and uses the URL http://marketing.contoso.com.

You have a Microsoft SharePoint Online environment. External users use the environment to access content.

You plan to create a PerformancePoint dashboard in WebApp1. The dashboard will retrieve data from a SharePoint Online site.

You need to recommend a solution to ensure that the data is always retrieved from SharePoint Online by using an account named service@contoso.onmicrosoft.com. The solution must minimize the amount of custom development.

What should you include in the recommendation?

A. Remote BLOB Storage (RBS)

B. cross-firewall access zones

C. Network Access Protection (NAP)

D. Network Load Balancing (NLB)

E. the Access Services service application

F. a BLOB cache

G. service application groups

H. the Secure Store Service service application

I. user policies

J. Active Directory Federation Services (AD FS)

K. Information Rights Management (IRM)

L. SharePoint Health Analyzer

M. alternate access mappings

N. Microsoft Visual Studio 2010

O. managed accounts

P. an ASP.NET Membership Database

Correct Answer: H

---

**QUESTION 12**

You are a SharePoint administrator for Northwind Traders.

The company has 20,000 employees distributed across 11 different departments. You plan to implement a SharePoint Server 2010 server farm for internal collaboration.

You need to recommend a solution that provides users with the ability to update their user attributes in Active Directory.

What should you recommend?

A. a User Profile Service Application

B. Active Directory Federation Services (AD FS)

C. Business Connectivity Services

D. Active Directory Rights Management Services (AD RMS)

Correct Answer: A
