Implementation

Version:Demo

QUESTION 1

To ensure that all web traffic is secure from the client to the application server, which two layers have to be configured for SSL? (Choose two.)

- A. Client to Web server
- B. Web server to node agent
- C. Web server to application server
- D. Application server to node agent
- E. Node agent to deployment manager

Correct Answer: AC

QUESTION 2

What is one of the benefits of using a federated repository over a user registry?

- A. Does not support identity profiles
- B. Supports only one registry in a realm
- C. Supports multiple registries within a realm
- D. Provides account and password policy support

Correct Answer: C

Federated repositories enable you to use multiple repositories with WebSphere® Application Server. These repositories, which can be file-based repositories, LDAP repositories, or a sub-tree of an LDAP repository, are defined and theoretically combined under a single realm. All of the user repositories that are configured under the federated repository functionality are invisible to WebSphere Application Server.

QUESTION 3

Heapdumps, javacores, and system cores are recommended to be generated for which kind of IBM WebSphere Application Server problems?

- A. Slow page rendering
- B. High CPU and disk I/O
- C. Slow File uploads and downloads

D. System hangs and out of memory

Correct Answer: B

Reference: <https://www-01.ibm.com/support/docview.wss?uid=swg21138203>

QUESTION 4

Which is true about software repositories for IBM Installation Manager?

- A. Repositories must be local.
- B. Repositories must be online.
- C. Repositories can be either local or online.
- D. Repositories are only in the media package.

Correct Answer: C

IBM Installation Manager is a single installation program that can use remote or local software repositories to install, modify, or update certain IBM products. It determines and shows available packages, checks prerequisites and interdependencies, and installs or modifies the selected packages. You also use IBM Installation Manager to uninstall the packages that it installed.

QUESTION 5

Which of the following can be queried to get PMI data?

- A. Server Cell
- B. JMX Connectors
- C. MBean ObjectNames
- D. Application ServerNames

Correct Answer: C

PMI data can be gathered from the J2EE managed object MBeans or the WebSphere Application Server PMI Perf MBean.

QUESTION 6

Which of the following is true of managing scopes in the Integrated Solutions Console?

- A. The node scope has precedence over all the scopes.
- B. The cluster scope has precedence over all the scopes.
- C. The application scope has precedence over all the scopes.
- D. The network deployment scope has precedence over all the scopes.

Correct Answer: C

Reference: https://www.ibm.com/support/knowledgecenter/en/SSAW57_9.0.0/com.ibm.websphere.nd.multiplatform.doc/ae/rcon_scope.html

QUESTION 7

Which of the following is a valid step in the process to update a single file in a deployed enterprise application using the monitored directory?

- A. Modify the property file to set the time when the file should be deployed to the application.
- B. Modify the property file to set the email address of the administrator to email when the file is updated.
- C. Modify the property file to set the URL to the location where the file can be retrieved from the internet.
- D. Modify the property file to set the type of the operation, the location of the file, and the location within the deployed application where the file will go.

Correct Answer: B

QUESTION 8

An administrator installs IBM WebSphere Application Server and an HTTP server, but when configuring the environment, the administrator finds that the WebSphere Plug-in is missing.

Which tool can be used to fix this issue?

- A. Customization Tool Box
- B. IBM Installation Manager
- C. Profile Management Tool
- D. Integrated Solutions Console

Correct Answer: D

In the WebSphere Integrated Solutions Console, the web server is represented as a specific server type, and you can view or modify all of the configuration properties used in the plugin-cfg.xml file for the web server plug-in from the WebSphere Integrated Solutions Console.

QUESTION 9

When creating a health policy, which condition should be selected to track requests that have a significantly decreased response time?

- A. Workload
- B. Age-based
- C. Storm drain
- D. Excessive response time

Correct Answer: C

The Storm drain condition tracks requests that have a significantly decreased response time.

QUESTION 10

An administrator attempts an IBM Web Sphere Application Server package installation, but it fails.

What must the administrator do before making another attempt?

- A. Uninstall IBM installation Manager and reinstall it.
- B. Use Installation Manager to uninstall everything under the package, and ignore any errors.
- C. Delete everything in the product directory before uninstalling the package using Installation Manager
- D. Restore a backup copy of the previous version of the product before using Installation Manager again.

Correct Answer: C

QUESTION 11

What must be done to delete one or more files from an application when using a partial application update?

- A. Manually delete the files from the file system (on all nodes if clustered).
- B. Supply the paths to the files that should be deleted in the administrative console.
- C. Include a META-INF/ibm-partialapp-delete.props in the partial application update file.
- D. Select the files that need to be deleted in the file selector section of the form for the partial application update.

Correct Answer: C

If you want to delete application files when you deploy a partial application update, you must first supply a special metadata file called META-INF/ibm-partialapp-delete.props in the partial application compressed

file before you continue with the following procedure.

Etc.

QUESTION 12

Which of the following is a prerequisite for configuring single sign-on for authentication using LTPA cookies?

- A. All server must use the same IBM HTTP Server.
- B. All servers must be configured as part of the same DNS domain.
- C. All servers must use an IBM Domino Directory that is configured for LDAP access.
- D. All servers must be managed by the same IBM WebSphere Application Server Deployment Manager.

Correct Answer: B

To take advantage of support for SSO between WebSphere Application Servers or between WebSphere Application Server and a Domino server, applications must meet the following prerequisites and conditions:

*

Verify that all servers are configured as part of the same DNS domain.

*

Etc.
