Vendor: IBM

Exam Code: 000-571

Exam Name: IBM Tivoli Process Automation Engine V7.5
Implementation

Version: Demo

QUESTION NO: 1

Which statement is true about asynchronous data validation?

- A. Data in a field is immediately validated when a user moves off of the field.
- B. Background validation is required to be active when a screen reader is being used.
- C. To be used, asynchronous data validation must be enabled for all fields of an application.
- D. To enable asynchronous data validation for all applications, add the statement ASYNCHRONOUS = 'Y' to the PRESENTATIONXML file.

Answer: A

Explanation:

QUESTION NO: 2

Where is Application Server security enabled?

- A. Security application
- B. Maximo.properties file
- C. Mxserver.properties file
- D. System Configuration application

Answer: B

Explanation:

QUESTION NO: 3

How are the new settings for the log level refreshed and applied?

- A. Restart the Web server
- B. Log out completely and then log in again
- C. Log in as MAXADMIN and restart the log service
- D. Perform the Apply Settings action in the Logging application

Answer: D

Explanation:

QUESTION NO: 4

What is a reason to use the Database Configuration application?

- A. It is used to invoke the integrity Checker application.
- B. It is used to view or change the current number of tax types that are used.
- C. The set of synonym values for a given attribute is constructed in the Database Configuration application.
- D. The Maximo security group required to access a given Maximo business object is configured using the Database Configuration application.

Answer: B

Explanation:

QUESTION NO: 5

What is the main purpose of a cron task?

- A. To set up the workflow clock
- B. To run scheduled jobs or tasks
- C. To synchronize the scheduled jobs with the current job plans
- D. To synchronize the Currency application with the Exchange Ratio variable

Answer: B

Explanation:

QUESTION NO: 6

What does the Reference Count field count in a conditional expression record?

- A. The number of conditional expressions used
- B. The number of versions for a specific expression
- C. The number of times the expression has been modified
- D. The number of times the condition is used throughout the system

Answer: D

Explanation:

QUESTION NO: 7

What are acceptable variable types in condition expressions?

- A. Substitution and bind
- B. Substitution and fixed
- C. Replacement and bind
- D. Replacement and fixed

Answer: C

Explanation:

QUESTION NO: 8

Which statement describes the usage of the Conditional Expression Manager?

- A. To set user database permissions
- B. To set organizational communication templates
- C. To set and control the generation of ad hoc reports
- D. To set and control access to fields, tabs, and applications

Answer: D

Explanation:

QUESTION NO: 9

How are Tivoli process automation engine (Tpae) languages installed?

- A. Select languages during the Tpae installation
- B. Select languages during the maximo.ear build
- C. Select languages during the maximo.ear deployment
- D. Select languages during the Tpae language pack installation

Answer: A

Explanation:

QUESTION NO: 10

A company set is required for setting up which data record?

- A. Vendors
- B. Companies
- C. Company Master
- D. Chart of Accounts

Answer: C

Explanation:

QUESTION NO: 11

Where is the attached documents location defined when using IBM WebSphere Application Server and IBM HTTP Server?

- A. web.xml file
- B. httpd.conf file
- C. plugin.conf file
- D. application.xml file

Answer: B

Explanation:

QUESTION NO: 12

Where can the mxs.db.fetchsize property be changed?

- A. Logging application
- B. Logging.properties file
- C. Mxserver.properties file
- D. System Properties application

Answer: D

Explanation:

QUESTION NO: 13

Which statement is true about the Database Configuration application admin mode?

- A. Cron task processing continues.
- B. There is no need to shut down the admin server.
- C. Event listeners continue to receive events but go into buffer-only mode.
- D. Users with the admin security role can continue to access system applications.

Answer: B

Explanation:

QUESTION NO: 14

Which field is a prerequisite before creating a new organization?

- A. Country
- B. Tax Code
- C. Description
- D. Currency Code

Answer: D

Explanation:

QUESTION NO: 15

How are long running SQL statements monitored?

- A. Set the SQL logger to LOG and review the output in the log file
- B. Set the Root logger to DEBUG and review the output in the log file
- C. Set the mx.e.db.logSQLTimeLimit properties and review the output in the log file
- D. Set the mx.e.db.fetchResultLogLimit properties and review the output in the log file

Answer: C

Explanation:

QUESTION NO: 16

What are three performance related properties? (Choose three.)

- A. mx.e.mbocount
- B. mx.e.db.SQLlog

- C. mxe.db.mboobject
- D. mxe.db.logResultSet
- E. mxe.db.logSQLTimeLimit
- F. mxe.db.fetchResultLogLimit

Answer: A,E,F

Explanation:

QUESTION NO: 17

What task must be performed as part of initial data entry?

- A. Create Tool
- B. Create Craft
- C. Create Order
- D. Create Organization

Answer: D

Explanation:

QUESTION NO: 18

Which two properties must be set for attached documents? (Choose two.)

- A. mxe.doclink.path01
- B. mxe.doclink.filetype
- C. mxe.doclink.appserver
- D. mxe.doclink.doctypes.html
- E. mxe.doclink.doctypes.defpath

Answer: A,E

Explanation:

QUESTION NO: 19

Which statement is true about appenders?

- A. Logging requests can be sent to multiple destinations.

- B. Logging requests cannot be sent to multiple destinations.
- C. Appenders can only be created by inserting their name into the log.properties file.
- D. Appenders cannot be deleted because they are managed by Tivoli process automation engine V7.5.

Answer: A

Explanation:

QUESTION NO: 20

How can database performance be improved?

- A. turn off all cron tasks
- B. add triggers to support user queries
- C. add indexes to support user queries
- D. configure the database to allow nulls in all columns

Answer: C

Explanation:

QUESTION NO: 21

Which statement is true about Maximo applications and the Application Designer?

- A. The Application Designer is used to modify the layout of a user's Start Center.
- B. Every application has a presentation.xml file that contains all the information required to build the application's user interface.
- C. When a user starts an application, the maxapplication.xml file is retrieved from the database and is placed in the memory of the application server.
- D. To preserve data integrally, all edits of application controls such as text boxes, buttons, and tabs should be done directly in the presentation.xml file.

Answer: B

Explanation:

QUESTION NO: 22

Where are General Ledger accounts created?

- A. Finance application
- B. Logging application
- C. Work Entry application
- D. Chart of Accounts application

Answer: D

Explanation:

QUESTION NO: 23

Currency Codes can be used in which application?

- A. Billing application
- B. Receiving application
- C. Purchase Orders application
- D. General Ledger Accounts application

Answer: C

Explanation:

QUESTION NO: 24

How is the Chart of Accounts application used?

- A. To create the links between the GL and the Organizations
- B. To create the General Ledgers (GL)for work order tracking
- C. To define the values for GL components for financial tracking
- D. To manage the user rights to access financial tracking options

Answer: C

Explanation:

QUESTION NO: 25

Where are workflow processes designed?

- A. Location application
- B. Properties application

- C. Workflow Designer application
- D. Work Order Tracking application

Answer: C

Explanation:

QUESTION NO: 26

Which option is available when setting password rules in the Security Controls action item?

- A. Delete excluded passwords
- B. Analyze existing passwords for strength
- C. Exclude the use of words from the data dictionary as passwords
- D. Send e-mails to users whose passwords are determined to violate new password rules

Answer: A

Explanation:

QUESTION NO: 27

Which statement describes how to enable Application Server security?

- A. Make a change to the mxserver.xml file and then rebuild and redeploy the EAR files.
- B. Enable it on the J2EE platform and use the Database Configuration application to set the value of UseAppServerSecurity to 1.
- C. Enable it on the J2EE platform. Tivoli process automation engine is capable or automatically recognizing the security setting.
- D. Make a change to the maximo properties file and two web.xml files, rebuild and redeploy the EAR files, and then enable it on the J2EE platform.

Answer: D

Explanation:

QUESTION NO: 28

Which group must be changed to expand the set of initial security rights for all new users?

- A. MAXREG group
- B. MXINTADM group

- C. DEFLTREG group
- D. MAXIMOUSERS group

Answer: C

Explanation:

QUESTION NO: 29

Where is application access defined?

- A. Rights application
- B. Access application
- C. Security Groups application
- D. Application Definition application

Answer: C

Explanation:

QUESTION NO: 30

When using Migration Manager, collection restrictions for objects and attributes are migrated but which table is not?

- A. MAXOBJECTS
- B. COLLECTIONAUTH
- C. SECURIWRESTRICT
- D. MIGRATIONOBJECTS

Answer: B

Explanation:

QUESTION NO: 31

Which two options are valid target types for a Migration Manager package? (Choose two.)

- A. file
- B. URL
- C. database

- D. another environment
- E. database connection string

Answer: A,C

Explanation:

QUESTION NO: 32

A user has created a new domain called EXIWOSTATUS and wants to migrate in to another environment. Which type and processing action of the Migration Manager package should be used?

- A. Type Exact; action Add
- B. Type Snapshot action Create
- C. Type Exact action AddChange
- D. Type Snapshot action AddChange

Answer: D

Explanation:

QUESTION NO: 33

Where are the Tivoli process automation engine properties defined?

- A. User Properties application
- B. Report Properties application
- C. System Properties application
- D. CronTaskProperties application

Answer: C

Explanation:

QUESTION NO: 34

What is the definition for Result Sets as related to a Start Center?

- A. The result set portlet displays the applications that a user frequently uses.
- B. The result set list displays the actual, target, and variance values for each KPI.
- C. The result set portlet displays the results of a saved query in either list format or graphical form.

D. A result set is a listing of all item and company sets for the logged in user based on their security profile.

Answer: C

Explanation:

QUESTION NO: 35

Which statement is true about Start Center layouts?

A. The Start Center column layouts that are available include Equal Width, Wide-Narrow, and Narrow-Wide.

B. At any time¹ the system administrator can make changes to the Start Center layout, but not the content, and push those changes out to all affected users.

C. The administrator (or user with appropriate security privileges) can specify the number of Start Center portlet rows to accommodate specific computer monitors.

D. Care must be taken when adding portlets to a Start Center template as the order in which the portlets are added becomes the order in which they are displayed on the Start Center.

Answer: A

Explanation:

QUESTION NO: 36

By default, at which database level are the domains created?

A. Set

B. Site

C. System

D. Organization

Answer: C

Explanation:

QUESTION NO: 37

What are the steps to configure the application import export functionality?

- A. Create the Object Structure, create the Publish Channel, configure an external system
- B. Create the Object Structure, create the Enterprise Service, configure an external system
- C. Create a Migration Manager package to import and export data, configure Security Group options
- D. Create the Object Structure, configure the supported applications, configure Security Group options

Answer: D

Explanation:

QUESTION NO: 38

Which statement is true about the Workflow Administration application?

- A. It can be used to modify a workflow process.
- B. It can be used to activate or deactivate a workflow process.
- C. It can be used to view and manage active instances of a workflow process.
- D. It can be used to view and manage both active and inactive instances of workflow processes.

Answer: C

Explanation:

QUESTION NO: 39

Which two protocols are available for defining an e-mail listener? (Choose two.)

- A. IMAP
- B. POP3
- C. SMTP
- D. GPRS
- E. SOAP

Answer: A,B

Explanation:

QUESTION NO: 40

Which two attributes are required to create a new message in the Bulletin Board application? (Choose two.)

- A. Site
- B. Subject
- C. Message
- D. Organization
- E. Expiration Date

Answer: B,E

Explanation:

QUESTION NO: 41

If an object is defined at the ORGSITE level, which field will be required?

- A. SITE field
- B. ORG field
- C. SITEID field
- D. ORGID field

Answer: C

Explanation:

QUESTION NO: 42

A company is about to implement an inbound Integration based on interface tables. When testing the integration, the developers noticed the data is not being properly imported to the database and they are able to identify errors in the log files. How is the root cause of the problem identified?

- A. Review the xml code
- B. Recreate the Interface Tables from the External System application
- C. Verify the messages in the JMS queues and drop all error messages
- D. Use the Message Reprocessing application to review, modify, and reprocess the inbound messages

Answer: D

Explanation:

QUESTION NO: 43

A customer has configured workflow process A to be auto-initiated after a new service request

(SR) record is created. Which action automatically starts workflow process B as well as workflow process A after the new SR record is created?

- A. Create an action to start workflow process B after a new SR record is created.
- B. Create an escalation to start workflow process B after a new SR record is created.
- C. From the Selection Action menu, choose the Set Process to Auto-initiate option for the workflow process B.
- D. Configure the SR application to automatically start both workflow processes after a new SR record is created.

Answer: B

Explanation:

QUESTION NO: 44

Actions are used in which three processes? (Choose three.)

- A. workflow
- B. cron tasks
- C. escalations
- D. integration channels
- E. service level agreements
- F. communication templates

Answer: A,C,E

Explanation:

QUESTION NO: 45

Which two statements are true about Interactions? (Choose two.)

- A. Interactions can be created and configured in the Create Interaction application.
- B. Interactions can be reviewed, modified, and deleted in the Interactions application.
- C. Interactions can be created and configured in the Web Services Library application.
- D. Interactions can be used to create and deploy Web services for inbound integrations.
- E. Interactions can be created, configured, modified, and deleted in the Interactions application.

Answer: A,B

Explanation:

QUESTION NO: 46

A company has a requirement to create an inbound interface. During the design phase, the Integration developer was asked about the possibilities to integrate the product with an external system. What are three standard integration methods? (Choose three.)

- A. Data Loader
- B. Web Services
- C. FlatFile Import
- D. Interface Tables
- E. Database Inserts
- F. DB DUMP Import

Answer: B,C,D

Explanation:

QUESTION NO: 47

What are two possible options to create an escalation which only applies to all work orders of one organization? (Choose two.)

- A. assign value to site attribute
- B. assign value to condition attribute
- C. assign value to organization attribute
- D. assign the escalation to the proper security group
- E. associate all sites within the organization to the escalation

Answer: B,C

Explanation:

QUESTION NO: 48

When creating a Launch in Context entry, what also has to be created to make the entry available for user interface controls?

- A. Security Group
- B. Java Bean Class
- C. Signature Option
- D. Conditional User Interface

Answer: C

Explanation:

QUESTION NO: 49

Where are roles used?

- A. communication template, escalation, actions, e-mail listeners
- B. communication template, escalation, service level agreement, workflow
- C. communication template, notifications, service level agreement, workflow
- D. communication template, notifications, service level agreement, e-mail listeners

Answer: B

Explanation:

QUESTION NO: 50

A person record is stored in the database at which level?

- A. Set
- B. Site
- C. System
- D. Organization

Answer: C

Explanation:

QUESTION NO: 51

Which statement is true about a labor record?

- A. Labor records are used for tracking labor information.
- B. Outside labor must reference a valid labor rate contract.
- C. A labor record must reference a single craft/skill level combination.
- D. The Overtime Refused is defined as the number of times this labor code refused overtime.

Answer: A

Explanation:

QUESTION NO: 52

Which step is involved in preparing a communication template for use?

- A. use the query builder to write conditions
- B. change the status of the template to Active
- C. run the regular expression builder to insert substitution variables
- D. assign a value for the recipient group in the Escalations application

Answer: B

Explanation:

QUESTION NO: 53

A calendar record is defined at which level?

- A. Site
- B. Sets
- C. System
- D. Organization

Answer: D

Explanation:

QUESTION NO: 54

Where must a value be entered in the Domain application in order for a domain value to be organization-specific?

- A. In the Sitefield
- B. In the Domainfield
- C. In the Organization field
- D. In the Organization options

Answer: C

Explanation:

QUESTION NO: 55

Which record has one or more skill levels and premium pay codes?

- A. Craft
- B. Labor
- C. Owner Group
- D. Person Group

Answer: A

Explanation:

QUESTION NO: 56

Which variables are automatically available when creating an automation script?

- A. Implied
- B. Implicit
- C. Absolute
- D. Expressed

Answer: B

Explanation:

QUESTION NO: 57

A company has a requirement to customize the Locations application and add a new button to open an external document repository. Once the document repository is a Web-based application, which standard process would achieve this requirement?

- A. create an interaction
- B. create a workflow process
- C. create a custom Javaclass
- D. create a Launch in Context

Answer: D

Explanation:

QUESTION NO: 58

Which statement about using attachments is true for communication templates?

- A. An option is to send a document folder as the attachment with the communication.
- B. When the communication template is created with attachments, the attachments are compressed for storage in the database as a blob.
- C. Communication templates can use substitution variables for the type of document to be sent so that an appropriate attachment is always selected.
- D. When multiple documents are attached to a communication template, they are compressed for sending by the workflow at the time of submission.

Answer: D

Explanation:

QUESTION NO: 59

Which type of action contains two or more action records?

- A. Application
- B. Action Group
- C. Custom Class
- D. Change Status

Answer: B

Explanation:

QUESTION NO: 60

A record must be defined at which level in order for it to be available for each user in any organization?

- A. SITE
- B. GLOBAL
- C. SYSTEM
- D. ORGANIZATION

Answer: C

Explanation:

QUESTION NO: 61

Which two statements are true about the Workflow Administration application? (Choose two.)

- A. It allows users to accept an assignment.
- B. It allows users to stop a workflow process.
- C. It allows users to start a workflow process.
- D. It allows users to delete a workflow process.
- E. It allows users to view or modify assignments.

Answer: B,E

Explanation:

QUESTION NO: 62

A automation script may contain one or more variables. Which option is a valid binding type?

- A. Field
- B. Column
- C. Attribute
- D. Application

Answer: C

Explanation:

QUESTION NO: 63

How is an e-mail listener definition enabled to poll a specified e-mail account?

- A. Check the Active check box
- B. Use the Activate/Deactivate Listener Select Action menu item
- C. Change status to Active using the Status Change icon on the toolbar
- D. Change status to Active using the status Change Status in the Select Action menu

Answer: B

Explanation:

QUESTION NO: 64

A report cannot show more than 200 records even if a query is generated that contains greater than 200 records. Which option restricts the output?

- A. Enable Limit Records and set a Max Record Limit value
- B. Enable Max Records and set an Upper Record Limit value
- C. Enable Restrict Records and set a Max Record Limit value
- D. Enable Record Controls and set an Upper Record Limit value

Answer: A

Explanation:

QUESTION NO: 65

A link has been added to another Key Performance Indicator (KPI) when designing a KPI and it has been displayed on the Start Center. What happens when the related KPI link is selected in the KPI portlet?

- A. The Start Center KPI changes the related KPI.
- B. The related KPI is displayed in a separate window.
- C. The KPI Manager application opens showing the related KPI.
- D. The KPI and related KPI are shown together on the Start Center.

Answer: C

Explanation:

QUESTION NO: 66

What are two types of reports that can be registered in the Tivoli process automation engine? (Choose two.)

- A. BIRT
- B. SQR
- C. EXCEL
- D. QUEST
- E. COGNOS

Answer: A,E

Explanation:

QUESTION NO: 67

When setting up a Key Performance Indicator (KPI), it must be made available to everyone so they can use it on their Start Center. Which setting must be selected?

- A. Is Valid
- B. Is Open
- C. Is Public
- D. Is Enabled

Answer: C

Explanation:

Topic 2, Volume B

QUESTION NO: 68

Which statement is true related to applications and the Application Designer?

- A. To delete a non-user created application such as Safety Plans, shut down the application server first.
- B. When an application is deleted, any domains that were created to support the application will be deleted automatically.
- C. To create a duplicate application use Application Designer and choose Select Action > Duplicate Application Definition.
- D. To clone an application, first copy the executable file (e.g. wotrack.exe) and give it the desired name of the new application.

Answer: C

Explanation:

QUESTION NO: 69

Which statement is true about appenders?

- A. If a logger is created, an appender cannot be created.
- B. One or more loggers can be associated with a specific or multiple appenders.
- C. One or more loggers cannot be associated with a specific or multiple appenders.
- D. Any appender has its own corresponding Tivoli process automation engine application.

Answer: B

Explanation:

QUESTION NO: 70

Which statement is an example of a replacement variable in a condition expression?

- A. &old_<attrname>
- B. :owner.id = &user&
- C. location, description
- D. &owner&. jobplan.Priority

Answer: B

Explanation:

QUESTION NO: 71

Which statement is true about using the Database Configuration application?

- A. Online database configuration changes must be implemented in admin mode.
- B. An online database configuration change can be implemented without entering admin mode.
- C. An online database configuration change can be implemented from the command line mode.
- D. Online database configuration changes can be implemented from the command line mode while the user interface is in admin mode.

Answer: A

Explanation:

QUESTION NO: 72

How are properties changed while the Java Virtual Machine is running?

- A. Select Live Refresh action item in the Logging Properties application

- B. Select Live Refresh action item in the System Properties application
- C. Select Apply Settings action item in the System Properties application
- D. Select Apply Settings action item in the Logging Properties application

Answer: B

Explanation:

QUESTION NO: 73

Which statement describes a function of the integrity checker?

- A. It validates database business object relationships.
- B. It looks for data inconsistencies and repairs them where possible.
- C. It compares the data dictionary with the underlying physical database schema.
- D. It examines the data contents of all database tables to check for missing or incomplete data.

Answer: C

Explanation:

QUESTION NO: 74

Conditional expression 1004 is changed, which is associated with the Assets application and the Locations application. The original conditional expression 1004 has a type value of 1 that is used to hide a field in these two applications. The type value is changed to 2 to show the field in the Locations application.

Which statement describes the result when the changed conditional expression is saved?

- A. The field shows in both applications
- B. The field remains hidden in both applications
- C. The field shows only in the Assets application
- D. The field shows only in the Locations application

Answer: A

Explanation:

QUESTION NO: 75

How are attached documents folders available in an application?

- A. From the application, click the Attachments icon
- B. From the application, select the Add Attached Documents action
- C. From the application, choose Select Action > Attachment Library/Folders> Add Folders
- D. From the application, choose Select Action > Attachment Library/Folders> Associate Folders

Answer: D

Explanation:

QUESTION NO: 76

Which cron tasks is included with Tivoli process automation engine V7.5?

- A. PMCronTask
- B. KPICronTask
- C. UserCronTask
- D. WorkOrderCronTask

Answer: B

Explanation:

QUESTION NO: 77

How are Tivoli process automation engine (Tpae) product languages installed?

- A. Tpae installation and LPInstall
- B. Tpae installation and TDToolkit
- C. TDToolkit and language pack installation
- D. Tpae installation and language pack installation

Answer: B

Explanation:

QUESTION NO: 78

Which statement is true about the Console Appender?

- A. It writes log statements to the console.log file.
- B. It writes log statements to the maximo_console.log file.
- C. It writes log statements to the Application Server Console.
- D. It writes log statements to the file specified in the File Name field of the Logging application.

Answer: C

Explanation:

QUESTION NO: 79

Which two methods can be used to specify that a record cannot be saved unless there is a value in a data field of an application? (Choose two.)

- A. in Database Configuration, set the Required flag to Yes for the data attribute
- B. use the Application Designer for the desired application and add the Required control
- C. create an Action linked to a crontask that checks if the appropriate data elements have a value
- D. in Organizations > Configuration Options> Define Required Fields, enter the application and field name for the required field
- E. in the Platform Configuration module> System Properties application, query for and enable the Required option for the appropriate data element(s)

Answer: A,B

Explanation:

QUESTION NO: 80

Where are system settings defined?

- A. Systems application
- B. System Settings application
- C. System Properties application
- D. Configuration Settings application

Answer: C

Explanation:

QUESTION NO: 81

Where are attached documents properties defined?

- A. Mxserver.properties file
- B. Document.properties file
- C. Organizations application
- D. System Properties application

Answer: D

Explanation:

QUESTION NO: 82

How can a Java Virtual Machine's memory usage be monitored?

- A. generate GO dumps
- B. generate heap dumps
- C. generate thread dumps
- D. generate Java core dumps

Answer: B

Explanation:

QUESTION NO: 83

What does the Tivoli process automation engine use to define variables in a condition expression?

- A. colon(:)
- B. semi-colon (;)
- C. fixed length delimiters
- D. comma separated values (CSV)

Answer: A

Explanation:

QUESTION NO: 84

What does the mxm.mbocount property display?

- A. the number of Maximo business objects (MBOs) created by a user
- B. the number of MBOs created from a query

- C. the number of MBOs created by the server
- D. the number of MBOs created during startup

Answer: C

Explanation:

QUESTION NO: 85

What does an active workflow process define?

- A. the flow of working Application Designer
- B. the process to add an attribute to an application
- C. the different work to be performed by the lead craft
- D. the different paths that a record can take as it moves through a business process

Answer: D

Explanation:

QUESTION NO: 86

In order to create an Organization at least one General Ledger account must exist. Which application must be used to create it?

- A. General Cost application
- B. General Ledger application
- C. Cost Management application
- D. Chart Of Accounts application

Answer: D

Explanation:

QUESTION NO: 87

How can the work being done by a Java Virtual Machine be viewed?

- A. generate a GO dump
- B. generate a heap dump
- C. generate a thread dump

D. generate a process dump

Answer: C

Explanation:

QUESTION NO: 88

Where can messages be created that can be broadcast throughout the organization?

- A. KPI application
- B. User application
- C. Bulletin Board application
- D. Work Order Tracking application

Answer: C

Explanation:

QUESTION NO: 89

What is required in order to make a new Currency Code available to the applications?

- A. A user must make sure that the Active flag is set.
- B. A user must change the status of a Currency Code to Active.
- C. Read rights for each Security Group to this Currency Code must be granted.
- D. A user must define an exchange rate between the default Currency Code and a new one.

Answer: A

Explanation:

QUESTION NO: 90

What is true about the Chart of Accounts application?

- A. It is a set-level application.
- B. It is a site-level application.
- C. It is an enterprise-level application.
- D. It is an organization-level application.

Answer: D

Explanation:

QUESTION NO: 91

Which statement is true about configuring Application Server security?

- A. It manages authorization.
- B. It manages authentication.
- C. It is used to import users from LDAP.
- D. It is used to manage both authentication and authorization.

Answer: B

Explanation:

QUESTION NO: 92

What is a person record?

- A. Record for a properties
- B. Record for an asset added on a work order
- C. Record for a job plan added to a safety plan
- D. Record for an individual whose name could appear as a text field value

Answer: D

Explanation:

QUESTION NO: 93

When creating limits and tolerances for a security group, which value option can be restricted in the default interlace?

- A. labor expenditure limit
- B. materials requisition limit
- C. budget limits (by organization)
- D. number of members of a security group

Answer: B

Explanation:

QUESTION NO: 94

What is one purpose of the security' select action item Authorize Group Reassignment?

- A. To approve security changes
- B. To enable the saved changes to a security group
- C. To authorize users to be able to remove users from security groups
- D. To remove all security groups from a given user in order to add new security groups

Answer: C

Explanation:

QUESTION NO: 95

Where are cron tasks created?

- A. Work application
- B. Logging application
- C. Systems application
- D. Cron Task Setup application

Answer: D

Explanation:

QUESTION NO: 96

When can a configuration record be added to a migration collection?

- A. if the migration object cannot migrate the data that is contained in the record
- B. if the migration collection that can migrate the data is contained in the business object
- C. if the record is supported by a migration object that can migrate the data contained in the record
- D. if the record is not supported by a migration object that can migrate the data contained in the record

Answer: C

Explanation:

QUESTION NO: 97

An admin user has created a new domain called EXTWOSTATUS and wants to include just this domain in the migration package. What must be done?

- A.** create a Migration Group that includes the EXTWOSTATUS domain object and use it in the Migration Manager package
- B.** create a Migration Object that includes the EXTWOSTATUS domain object and use it in the Migration Manager package
- C.** use the Migration Object that contains the MAXDOMAIN objects and set the proper Where clause from the Migration Objects table level
- D.** use the Migration Group(s) that contains the MAXDOMAIN objects and set the proper Where clause from the Migration Groups table level

Answer: D

Explanation:

QUESTION NO: 98

If a user wants to create a Migration Manager package that will either add or change the data in a destination environment, the Migration Manager package processing action must be set to what?

- A.** Add
- B.** Modify
- C.** Change
- D.** Add Change

Answer: D

Explanation:

QUESTION NO: 99

Which statement is true about Start Centers?

- A.** Each security group can have an unlimited number of available Start Center templates associated with it.
- B.** When there is more than one Start Center page available to a user, the system displays tabs

for each page.

C. The security privilege to add / modify Start Center templates is related to a User record and controlled through the Enable Start Center Maintenance check box.

D. Start Centers can be designated as Dependent (the information from multiple State Centers is combined) or Independent, (meaning each template is displayed separately).

Answer: B

Explanation:

QUESTION NO: 100

What is the purpose of the Display Settings icon located at the top of the Start Center page?

A. It is used to define the font size and type of each text-based Start Center portlet.

B. If a user has more than one Start Center page available¹ they can select the page to open by default.

C. On a KPI Graph portlet, Display Settings defines whether the selected [<P1 is shown as a gauge or as a bar chart.

D. It is used to apply colors to rows in the Result Set portlet to highlight set points and implement user-defined standards.

Answer: B

Explanation:

QUESTION NO: 101

Where is logging levels defined?

A. User application

B. Report application

C. Systems application

D. Logging application

Answer: D

Explanation:

QUESTION NO: 102

What are the four types of communication template recipients?

- A. roles, persons, ticket owners, and workflow owners
- B. roles, persons, person groups, and e-mail addresses
- C. assigned persons, action initiators, supervisors, and system administrators
- D. ticket owners, workflow owners, ticket assignees, and system administrators

Answer: B

Explanation:

QUESTION NO: 103

A user has access to records from SITE Bedford. Another user has access to SITE Atlanta in a different organization. In order for a record to be available for both users¹ the record must be defined at which level?

- A. SITE
- B. ORG
- C. GLOBAL
- D. SYSTEM

Answer: D

Explanation:

QUESTION NO: 104

To provide full functionality, the E-mail Listeners application works together with which two items? (Choose two.)

- A. cron tasks
- B. Security groups
- C. Service requests
- D. Workflow processes
- E. Work order tracking

Answer: A,D

Explanation:

QUESTION NO: 105

A company is about to implement an inbound Integration based on Web services. Which two

system properties must be configured before deploying a Web service? (Choose two,)

- A. mxe.int.port
- B. mxe.int.webappurl
- C. mxe.int.defaultuser
- D. mxe.int.adminuserid
- E. mxe.int.containerdeploy

Answer: B,E

Explanation:

QUESTION NO: 106

What can an administrator do to broadcast a message to all users of an organization?

- A. Create a notification record
- B. Configure the e-mail listener
- C. Create a bulletin board record
- D. Create a communication template record

Answer: C

Explanation:

QUESTION NO: 107

Automation scripts can be created for use within a workflow process. Which launch point can be used in a workflow process?

- A. Node launch point
- B. Action launch point
- C. Workflow launch point
- D. Custom conditional launch point

Answer: B

Explanation:

QUESTION NO: 108

What does it mean when a record has a SITEID field?

- A. The record may be defined at a SITE level.
- B. The record must be defined at a SITE level.
- C. The record may be defined at a SYSTEMSITE level.
- D. The record must be defined at a SYSTEMSITE level.

Answer: A

Explanation:

QUESTION NO: 109

Which statement is true related to qualifications as applied to a labor record?

- A. A labor record can have any number of qualifications.
- B. The system requires that only labor records with qualifications can charge time to the task.
- C. All labor records have the same expiration date defined as the date the qualification expires.
- D. When a laborer's qualification has expired, the labor record can no longer charge time to a work order.

Answer: A

Explanation:

QUESTION NO: 110

How can an administrator configure the system to automatically send an e-mail to the helpdesk manager when a service request record has been in NEW status for over five days?

- A. create an action
- B. create an escalation
- C. configure the e-mail listener
- D. create a communication template

Answer: B

Explanation:

QUESTION NO: 111

http://:HOSTNAME/maximo/ui/maximo.jsp?event=loadapp&value=:APP&uniqueid=:OWNERID

What is the purpose of including this information in a communication template?

- A. This URL will load the primary assigned application for the recipient.
- B. This URL will provide a direct link for the recipient to check their workflow assignments.
- C. This URL will provide a link for the recipient to view any service requests for any owner.
- D. This URL will launch the Start Center of the user who clicks it because it is the default application for all users.

Answer: B

Explanation:

QUESTION NO: 112

Where can a user find out how much time is left to complete an assignment for a workflow task?

- A. in the Task Management application
- B. in the Workflow Designer application
- C. in the Work Management application
- D. in the Workflow Administration application

Answer: D

Explanation:

QUESTION NO: 113

Which application defines a URL that opens a browser for Web applications?

- A. Publish Channels
- B. External Systems
- C. Launch in Context
- D. Web Services Library

Answer: D

Explanation:

QUESTION NO: 114

What are two available actions in the Workflow Administration application? (Choose two.)

- A. Stop Process
- B. Start Process
- C. Save Process
- D. Delete Process
- E. View/Modify Assignments

Answer: A,E

Explanation:

QUESTION NO: 115

Which two types of information are required when creating a new Launch in Context entry? (Choose two.)

- A. Status
- B. Console URL
- C. Launch Entry Name
- D. Operational Management Product Name
- E. Operational Management Product Version

Answer: A,E

Explanation:

QUESTION NO: 116

The Roles application is accessed through which module?

- A. Security
- B. Administration
- C. Platform Configuration
- D. Database Configuration

Answer: C

Explanation:

QUESTION NO: 117

A automation script may contain one or more variables. Each variable needs to be declared as to the direction of the data flow. What is a valid variable type?

- A. INTO
- B. INOUT
- C. ONEXIT
- D. TOEROM

Answer: B

Explanation:

QUESTION NO: 118

Which statement is true about labor?

- A. A labor inventory location maintains a balance of inventory items that were issued from a storeroom.
- B. A labor record belongs to one craft/skill combination that defines the labor rate that is charged to work orders.

Answer: A

Explanation:

QUESTION NO: 119

Which two statements are true about Integration Framework? (Choose two.)

- A. It supports direct database inserts on core objects.
- B. It supports direct external system database inserts.
- C. It supports using IBM Tivoli Workload Scheduler to import external data.
- D. It supports different data formats including interfaces tables, flat files, and XML files.
- E. It supports multiple communication modes including Web services, HTTP post, and Java Message Service messaging.

Answer: D,E

Explanation:

QUESTION NO: 120

Which statement is true about a person record?

- A. Person records can never be deleted.
- B. The status of an active person record can be changed to inactive at anytime.
- C. Person records can be deleted if they are not associated to a labor or user record.
- D. From the People application, related assets, locations, and job plans can be reviewed for a person.

Answer: C

Explanation:

QUESTION NO: 121

The Actions application is accessed through which system module?

- A. Security
- B. Administration
- C. Platform Configuration
- D. Database Configuration

Answer: C

Explanation:

QUESTION NO: 122

Actions can perform which three tasks? (Choose three.)

- A. Enable admin mode
- B. Execute a custom class
- C. Poll a communications log
- D. Reset a Web server queue
- E. Initiate an application action
- F. Set the value of afield on a record

Answer: B,E,F

Explanation:

QUESTION NO: 123

Which statement describe the purpose of the E-mail Listeners application?

- A. To broadcast service requests using e-mail
- B. To send and receive service requests using e-mail
- C. To process and send service requests using e-mail
- D. To receive and process service requests using e-mail

Answer: D

Explanation:

QUESTION NO: 124

Which statement defines an alphanumeric (ALN) domain?

- A. It is a simple list of values that use one of the alphanumeric data types.
- B. It is a dynamic set of alphanumeric values based on the values of another object.
- C. It is a list of alphanumeric and numeric values retrieved by multiple tables that are defined when a range is specified.
- D. It is a special type of table domain where the system brings back another value (or values) from the specified record.

Answer: A

Explanation:

QUESTION NO: 125

Notification is sent to users of business unit A when a P0 record stays in NEW status for over 15 days. However, users of business unit B have not received the notification for the same business scenario. Which three escalation settings should be verified? (Choose three.)

- A. Site
- B. Active
- C. Schedule

- D. Condition
- E. Applies To
- F. Organization

Answer: A,D,F

Explanation:

QUESTION NO: 126

Which statement defines a table domain?

- A. It is a simple list of values that use one of the table data types.
- B. It is a dynamic set of values based on the values of another object.
- C. It is a list of numeric values retrieved by multiple tables that are defined when a range is specified.
- D. It is a special type of table domain in which the system brings back another value (or values) from the specified record.

Answer: B

Explanation:

QUESTION NO: 127

When creating a labor record, the administrator has the option to set the labor shift. The shift information is used in the Assignment Manager application when assigning work orders to this labor record. Where is a shift created?

- A. Labor application
- B. Shifts application
- C. People application
- D. Calendars application

Answer: D

Explanation:

QUESTION NO: 128

An interaction can invoke a Web service and send data to it from an application. The interaction can then display data returned from the Web service and save this data to the application

database.

An Interaction is created from which application?

- A. End Points
- B. Interactions
- C. Create Interactions
- D. Web Services Library

Answer: C

Explanation:

QUESTION NO: 129

A company has a requirement to create an online interlace between Tivoli process automation engine and their external procurement system. Also the purchasing agent must be able to import Purchase Requests (PRs) and Purchase Orders (POs) when needed. Since the Purchasing Agent does not have access to Integration applications such as External Systems and Enterprise Services, what would be an approach to give the Purchasing Agent the ability to import POs and PR5?

- A. use the Migration Manager application to import P0/PR records
- B. give the Purchasing Agent access rights to the Data load application
- C. configure the application import functionality for Purchasing applications
- D. give the Purchasing Agent access rights only to the End Points application where they will be able to import data

Answer: C

Explanation:

QUESTION NO: 130

Which option needs to be set so that a report will not be made available to the users in general and will only be run in the background with the results being e-mailed?

- A. Admin Only
- B. E-mail Only
- C. Schedule Only
- D. Run in Background

Answer: C

Explanation:

QUESTION NO: 131

What are the three key steps required to make a report available to be run by a user?

- A. Register the report, import the report, activate the report
- B. Create the report, import the report, enable report security
- C. Register the report, import the report, enable report security
- D. Create the report, approve the report, enable report security

Answer: C

Explanation:

QUESTION NO: 132

When adding more than one Key Performance Indicator (KPI) to a KPI graph portlet, what happens to the portlet?

- A. It changes to a KPI list.
- B. It changes to a bar graph.
- C. Another KPI portlet is created.
- D. It adds an additional KPI gauge.

Answer: B

Explanation:

QUESTION NO: 133

A Key Performance Indicator (KPI) has been created and it has not had its Last Pun time changed which makes the actual reading inaccurate. How can this be updated?

- A. resave the KPI
- B. enable the KPICronTask
- C. change the Alert At value
- D. select Action > Update KPI

Answer: B

Explanation:

Topic 3, Volume C

QUESTION NO: 134

Which statement is true related to applications and the Application Designer?

- A.** All modifications to applications must be performed with the Application Designer
- B.** The files necessary to display an application are stored In the MAXAPPFFILES table in the database.
- C.** The code of a control can be modified with the Application Designer when used in code configuration mode.
- D.** Every application has a presentation XML that contains the information required to build the application's user interface

Answer: D

Explanation:

QUESTION NO: 135

A PDF needs to be added to Tivoli process automation engine. Where can this be done?

- A.** Manage Files Select Action from the application that allows attached documents
- B.** Manage Library Select Action from the application that allows attached documents
- C.** Manage Folders Select Action from the application that allows attached documents
- D.** Manage Documents Select Action from the application that allows attached documents

Answer: B

Explanation:

QUESTION NO: 136

The Conditional Expression Manager is accessed through which system module?

- A.** Security
- B.** Integration

- C. Administration
- D. System Configuration

Answer: C

Explanation:

QUESTION NO: 137

Where are attached document folders associated?

- A. Documents application
- B. any Single-Page application
- C. System Configuration application
- D. the application that allows attached documents

Answer: D

Explanation:

QUESTION NO: 138

What happens when the Rolling Appender reaches the file size limit?

- A. The current file is deleted and a new file is created
- B. The current file is renamed and a new file is created.
- C. The new log statements overwrite the older log on the same file.
- D. The current file is moved into the /maximo/logfile/archive directory and a new file is created

Answer: B

Explanation:

QUESTION NO: 139

Which two modifications can be made to the user interface of a selected application using the Application Designer? (Choose two.)

- A. add values to a domain
- B. add a tab to an application
- C. add an attribute to an object

- D. move a field within an application
- E. change the data type of an attribute

Answer: B,D

Explanation:

QUESTION NO: 140

How is the Condition Expression Builder accessed?

- A. select Condition Expression Builder from the Administration module menu
- B. select Condition Expression Builder icon in the Conditional Expression application toolbar
- C. select Condition Expression Builder icon in the Conditional Expression application details view
- D. select Condition Expression Builder from the Conditional Expression application Select Action menu

Answer: C

Explanation:

QUESTION NO: 141

An item set is required to generate data records. What are two of the records? (Choose two.)

- A. People
- B. Assets
- C. Locations
- D. Item Master
- E. Organizations

Answer: D,E

Explanation:

QUESTION NO: 142

Which statement explains the relationship of an E-audit fitter to the Database Configuration application?

- A. Using the Database Configuration application allows the creation of E-audit filters for main

objects only.

B. The type of information that requires these E-audit filters can be refined by using the E-audit filter on the Audit section of the Object tab within the Database Configuration application.

C. Included in the Database Configuration application is an action item called Enable E-audit Filter which allows the selection of the appropriate auditing requirements for a given database object

D. E-Audit filters are created for database objects in the Audit application and enabled using the E-audit filter selection dialog on each database object within the Database Configuration application.

Answer: B

Explanation:

QUESTION NO: 143

Which property prints a stack trace for fetch results?

A. mxe.db.fetchStack

B. mxe.db.fetchResult

C. mxe.db.fetchStackLogLimit

D. mxe.db.fetchResultLogLimit

Answer: D

Explanation:

QUESTION NO: 144

Which two sets must be created before creating an Organization? (Choose two)

A. Item Set

B. Data Set

C. Asset Set

D. Location Set
