Exam : 000-634

Title : Rational object orienten

analysis and design-part2

Version : DEMO

1. What is true of iterations?
A. A lifecycle phase may contain many iterations.
B. Iterations may contain many phases.
C. A major milestone marks the end of every iteration.
D. You establish plans for each phase, but not for iterations.
E. A construction iteration cannot include any activities from the Requirements workflow. Answer: A
2. Stereotypes in the UML support generalization among model elements.
A. True
B. False Answer: B
3. What is a derived attribute?
A. An attribute whose value may be calculated based on the value of other attributes within the class.
B. The value of an attribute for a particular object.
C. An attribute that is retrieved from a database.
D. An attribute that is inherited from a superclass.
E. An attribute with a fixed value. Answer: A
4. What is an abstract class?
A. A superclass for which no direct instances may be created.
B. A class that logically exists beyond the scope of the program that created it.
C. A class that manages the interface communications within a system or among different systems.
D. A class whose instances are collections of other objects.
E. A class that serves as a template for other classes. Answer: A
5. What characterizes a model?

A. It is the same thing as a diagram.
B. It is a complete description of a system from a particular perspective.
C. It is rarely needed if an iterative lifecycle is used.
D. It is not applicable to software development. Answer: B
6. What pase defines an association class?
A. Is primarily a construct used during detailed design.
B. Specifies that a class has attributes and operations.
C. Is represented with a second association line next to the original.
D. Should not be represented on class diagrams during analysis.
E. Specifies that in a many-to-many association, each link has attributes and possibly operations. Answer: E
7. Which of the following is not part of a use-case realization? (Select all that apply.)
A. Sequence diagrams
B. Use cases
C. Collaboration diagrams
D. Class diagrams Answer: ACD
0 Which of the following are characteristics of a complian chiest in a client complian relationship 2 (Calcut
8. Which of the following are characteristics of a supplier object in a client-supplier relationship? (Select all that apply.)
all that apply.)
all that apply.) A. You can reuse it independent of its existing clients.
all that apply.) A. You can reuse it independent of its existing clients. B. It is an instance of a subclass.

- A. A class whose instances are collections of other objects.
- B. A class for which you may create no instances.
- C. A class that logically exists beyond the scope of the program that created it.
- D. A class that serves as a template for other classes.
- E. A class that manages the interface communications within a system or among different systems.

Answer: A

- 10. What is a scenario? (Select all that apply.)
- A. A series of use cases that describe the functional requirements for the system.
- B. An instance of a use case.
- C. Something that has state, behavior, and identity.
- D. A set of time-ordered steps or statements expressed in natural language.

Answer: BD
