Select and Place:

Match the bandwidth usage optimization technique on the left with its definition on the right.

queuing

window size

traffic policing

data compression

limits the number of frames transmitted before an acknowledgement is received

reduces data size to save transmission time, optimizing the use of WAN bandwidth

allows network administrators to manage the varying demands generated by applications

discards packets or modifies some aspect of them (such as IP precedence)

Correct Answer:

Match the bandwidth usage optimization technique on the left with its definition on the right.

Four empty rectangular boxes for matching.

window size

data compression

queuing

traffic policing

+ limits the number of frames transmitted before an acknowledgement is received: window size+ reduces data size to save transmission time, optimizing the use of WAN bandwidth: data compression+ allows network administrators to manage the varying demands generated by applications: queuing+ discards packets or modifies some aspect of them (such as IP precedence): traffic policing
