QUESTION 4

A company has an environment where only some computers have the Symantec Workspace Virtualization (SWV) agent installed.

What happens to computers without the SWV Agent when an administrator distributes an MSI application through a Managed Delivery policy to all company computers and installs the application into a virtual layer?

A. The application installation fails

B. The application is installed as non-virtual, but the application is moved into a virtual layer after the SWV agent is installed

C. The SWV agent is automatically installed; then the application is installed into a virtual layer

D. The application is installed as non-virtual

Correct Answer: A

QUESTION 5

With what Service and Asset Management configuration item must an asset be associated to accurately assess its value?

A. Cost Center

B. Accounting Code

C. Depreciation Schedule

D. Owner

Correct Answer: D

QUESTION 6

An administrator has been notified that a new office location will be opening within a few weeks. The office is a large site that will have 8,000 managed endpoints. The data center is located in Lindon, Utah and the office is located in Houston, Texas.

What is the minimum number of site servers needed to support the new office location?

A. Four site servers

B. Two site servers

C. One site server

D. Three site servers

Correct Answer: C

QUESTION 7

A large organization wants to stagger the installation of software updates with computers in different organizational groups by installing the updates on different days.

How can an administrator accomplish this without continually creating separate software update policies that target the different organizational groups?

A. Configure Site Management settings so that each organizational group downloads the software update installation files from a different package server

B. Create clones of the Default Software Update Plug-in Policy and modify the target in each policy

C. Configure an automation policy that periodically disables the Software Update Plug-in by organizational group

D. Create clones of the Windows Patch Remediation Settings and modify the target in each policy

Correct Answer: A

QUESTION 8

Which two (2) fields are essential to the tracking and reporting of an associated asset when creating a lease schedule in IT Management Suite 8.1? (Choose two.)

A. Internal Reference

B. Start Date and End Date

C. Covered Hardware

D. Contract\\'s Assigned User

E. Contract\\'s Location

Correct Answer: BC

QUESTION 9

What can cause duplicate entries for a software resource in the Software Catalog?

A. Two applications reference the same installation files within the Software Catalog

B. Two software applications use the same applicability rule within the Software Catalog

C. Two software applications use the same detection rule within the Software Catalog

D. Two applications are imported by different methods into the Software Catalog

Correct Answer: C

QUESTION 10

In which two (2) locations should an administrator install the Symantec Installation Manager to facilitate the installation of IT Management Suite 8.1 on the target Notification Server? (Choose two.)

A. On the server that is to be the Notification Server to create an offline installation if this Notification Server has no internet access

B. On another server to remotely install it on the target Notification Server

C. On the server that is to be the Notification Server

D. It should be installed on a desktop class system to remotely install it on the target Notification Server

E. On another computer to create an offline installation package if the Notification Server has no internet access

Correct Answer: CE

QUESTION 11

Which function does each IT Management Suite 8.1. component perform?

Match the components on the left to the correct function on the right by clicking on the component and

dragging it to the appropriate function.

Select and Place:

| Component		Function
SQL Analysis Services		Provides a database for OLAP reporting
Notification Server		Presents business level reports
SQL Database Services		Provides a framework for IT Management Suite 8.1 functionality
Symantec Installation Manager		Allows for the management of licenses
Site Server		Communicates with the endpoints and the management server
Symantec Management Agent		Facilitates communication with the management server
SQL Reporting Services		Hosts the Symantec CMDB

Correct Answer:

Component		Function
	SQL Reporting Services	Provides a database for OLAP reporting
	Symantec Management Agent	Presents business level reports
	Symantec Installation Manager	Provides a framework for IT Management Suite 8.1 functionality
	Site Server	Allows for the management of licenses
	SQL Database Services	Communicates with the endpoints and the management server
	Notification Server	Facilitates communication with the management server
	SQL Analysis Services	Hosts the Symantec CMDB

QUESTION 12

Where should an administrator place the IT Management Suite 8.1 solution components in this diagram? Drag and drop the component name to the appropriate component location in the diagram.

Select and Place:

Correct Answer:

Primary
Notification Server

Child Notification
Server

Primary Site
Server

Internet Gateway

Microsoft SQL
Server

Secondary Site
Server

Answer Area

Primary Site
Server

Secondary Site
Server

Primary
Notification Server

Microsoft SQL
Server

Internet Gateway

Child Notification
Server
