### QUESTION 1

Which of the following is a task in the operations implementation service component of the implement phase?

- A. review Operation Design Document
- B. develop backup/recovery plan
- C. update and document logical and physical topology maps
- D. operations and network management system staging, installation, and configuration

Correct Answer: D

---

### QUESTION 2

Which implement phase service component consists of preparing for migration, executing a network migration plan and completing migration test cases?

- A. staging and system migration
- B. post implementation support handoff meeting
- C. detailed design development
- D. staff training
- E. migration plan development

Correct Answer: A

---

### QUESTION 3

Which three business requirements development activities are performed in the prepare phase before creating a technology strategy? (Choose three.)

Select exactly 3 answer(s) from the following:

- A. identifying and assessing customer business requirements
- B. documenting and categorizing customer business requirements in terms of performance, availability, capacity, and security
- C. producing a documented technology strategy
- D. creating a bill of materials
- E. presenting documented business requirements to a customer and having the customer validate them
- F. completing a site survey

Correct Answer: ABE

---

#### QUESTION 4

Which implement phase service component consists of preparing for migration, executing a network migration plan, and completing migration test cases?

- A. Staging and System Migration
- B. Post Implementation Support Handoff Meeting
- C. Detailed Design Development
- D. Staff Training
- E. Migration Plan Development

Correct Answer: A

---

#### QUESTION 5

Which is the most accurate statement regarding the business requirements development service component in the prepare phase. Select exactly 1 answer(s) from the following:

- A. Determine the appropriate cooling temperature for acustomer's server room.
- B. Analyze the customer's business requirements for a proposed solution.
- C. Analyze a customer's ongoing operational requirements.
- D. Identify a customer's technology requirements.

Correct Answer: B

---

#### QUESTION 6

Which three best describe the customer benefits of the Cisco Lifecycle Service approach? Select three.

- A. increase network staff productivity
- B. improve the skill sets of its staff members
- C. increase the value of and return on investment for its network
- D. increase the amount of time required to integrated network changes
- E. improve network availability, resiliency, security, and scalability
- F. increase the amount of server room rack space

Correct Answer: ACE

---

**QUESTION 7**

Conducting a project kick-off in the plan phase provides which of the following customer benefits?

Select exactly 1 answer(s) from the following:

- A. ensure that it receives detailed network diagrams
- B. reduce the risk of downtime due to facilities-related problems
- C. ensure end-user support immediately after the launch of a new system
- D. confirm project roles and responsibilities, as well as milestone dates

Correct Answer: D

---

**QUESTION 8**

In the design phase, which service component provides the customer with a comprehensive design?

- A. detailed design development
- B. Project Kick-off
- C. Staging plan
- D. High level design
- E. Implementation Plan

Correct Answer: A

---

**QUESTION 9**

Which three tasks are performed in the system monitoring service component of the operate phase? (Choose three.)

- A. define an operations plan supporting the configuration management database
- B. track events and report on system availability, resource capacity, and performance
- C. analyze process exceptions
- D. notify interested parties of problems identified, and escalate per-customer requirements
- E. monitor system to identify occurrences of service-level metrics dropping
- F. verify configuration management database

Correct Answer: BDE

---

### QUESTION 10

Your Certkiller trainee, Certkiller, asks you which of the following best describes customer benefits in delivering network readiness assessment services in the plan phase?

- A. ensures that the customer understands the steps of the implementation
- B. ensures that the eventual design will meet the business and technology requirements originally put forth by the customer
- C. helps achieve business goals by identifying and aligning Advanced Technologies (AT) to business requirements
- D. helps improve Return on Investment (ROI) and speed migration by enabling customer to identify, understand, and plan for necessary infrastructure changes and resource requirements
- E. ensures that the customer has the documentation needed to understand the details of the network that will be used when planning for future changes to the system
- F. helps minimize expensive, time-consuming, network-intrusive redesign by establishing a well- engineered detailed design early in the network lifecycle

Correct Answer: D

---

### QUESTION 11

In the implement phase, solution implementation involves which of the following task?

- A. execute test cases
- B. perform preliminary Site Assessment
- C. configure core products
- D. analyze high-level design and technology requirements of the customer

Correct Answer: C

---

### QUESTION 12

Which implement phase service component consists of explaining the benefits and limitations of purchased support options to a customer and ensuring that the customer understands operational processes and responsibilities?

Select exactly 1 answer(s) from the following:

- A. Staging and System Migration
- B. Post Implementation Support Handoff Meeting
- C. Detailed Design Development
- D. Staff Training

Correct Answer: B
