Vendor:Microsoft

Exam Code:70-696

Exam Name:Administering System Center
Configuration Manager and Intune

Version:Demo

QUESTION 1

You plan to deploy Microsoft Office 365 ProPlus to all of the users in your company.

You download the Office 365 ProPlus installation files.

You need to create a Microsoft Application Virtualization (App-V) package for the Office applications.

What should you do?

- A. From the downloaded installation files, run setup.exe.
- B. From a command prompt, run sftsequencer.exe.
- C. From the Microsoft Application Virtualization Sequencer, run the Sequencing Wizard.
- D. From Windows PowerShell, run New-AppvSequencerPackage.

Correct Answer: A

QUESTION 2

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. Configuration Manager is integrated with Windows Intune. All client computers and devices

are managed by using Configuration Manager.

You have a Wi-Fi network named Wi-Fi1.

You create a Wi-Fi profile named Wi-Fi1 and provision the profile for Windows RT 8.1 devices.

You create a collection named Collection1 that contains all of the devices that run Windows RT 8.1.

You need to ensure that the users who use the Windows RT 8.1 devices can connect to Wi-Fi1 without having to configure the wireless settings manually. The Wi-Fi profile must NOT be used on any other devices.

What should you do?

- A. Deploy Wi-Fi1 to the All Users collection.
- B. Deploy Wi-Fi1 to Collection1.
- C. Deploy Wi-Fi1 to the All Mobile Devices collection.
- D. Modify the profile properties of Wi-Fi1.

Correct Answer: A

QUESTION 3

Your network contains one Active Directory forest named contoso.com. The forest contains a deployment of Microsoft System Center 2012 R2 Configuration Manager. Configuration Manager has the client settings configured as shown in the following table.

Policy name	Priority	Client policy polling interval (minutes)
Default Client Settings	10000	60
Policy1	1	50
Policy2	2	40
Policy3	3	30

Policy1, Policy2, and Policy3 are deployed to a collection named Collection1.

You need to configure the clients in Collection1 to have a client policy polling interval of 30 minutes.

What command should you run? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

<input type="checkbox"/> Set-CMClientSetting	-Name	<input type="checkbox"/> Default Client Settings	<input type="checkbox"/> -PolicyPollingInterval 30
<input type="checkbox"/> Set-CMClientStatusSetting		<input type="checkbox"/> Policy1	<input type="checkbox"/> -Priority Decrease
<input type="checkbox"/> Update-CMClientStatus		<input type="checkbox"/> Policy2	<input type="checkbox"/> -Priority Increase
		<input type="checkbox"/> Policy3	

Correct Answer:

Answer Area

<input checked="" type="checkbox"/> Set-CMClientSetting	-Name	<input type="checkbox"/> Default Client Settings	<input checked="" type="checkbox"/> -PolicyPollingInterval 30
<input type="checkbox"/> Set-CMClientStatusSetting		<input checked="" type="checkbox"/> Policy1	<input type="checkbox"/> -Priority Decrease
<input type="checkbox"/> Update-CMClientStatus		<input type="checkbox"/> Policy2	<input type="checkbox"/> -Priority Increase
		<input type="checkbox"/> Policy3	

QUESTION 4

You need to identify the minimum number of Configuration Manager metering rules required to monitor the usage of App2 and App3. Which number should you identify?

- A. 1
- B. 2

C. 3

D. 4

E. 5

Correct Answer: C

<https://technet.microsoft.com/en-gb/library/gg712314.aspx>

QUESTION 5

You manage a multi-site deployment of Microsoft System Center 2012 R2 Configuration Manager. You need to ensure that clients use only their preferred distribution points for downloading content. Which objects and settings should you configure? To answer, select the appropriate objects and settings in the answer area.

Hot Area:

Answer Area

www.Pass4Lead.com

Objects:

<input type="checkbox"/>	Distribution points
<input type="checkbox"/>	Distribution point groups

Settings:

<input type="checkbox"/>	Boundary groups
<input type="checkbox"/>	Collections
<input type="checkbox"/>	Content
<input type="checkbox"/>	Group relationship
<input type="checkbox"/>	Security

Correct Answer:

Answer Area

www.Pass4Lead.com

Objects:

<input checked="" type="checkbox"/>	Distribution points
<input type="checkbox"/>	Distribution point groups

Settings:

<input checked="" type="checkbox"/>	Boundary groups
<input type="checkbox"/>	Collections
<input type="checkbox"/>	Content
<input type="checkbox"/>	Group relationship
<input type="checkbox"/>	Security

QUESTION 6

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager that contains the objects shown in the following table.

Object name	Type
Object1	Inventoried software
Object2	Configuration item
Object3	Configuration baseline
Object4	Antimalware policy
Object5	Software update

You are creating a new configuration baseline.

You need to identify which objects you can use as evaluation conditions within the new configuration baseline.

Which three objects should you identify? Each correct answer presents part of the solution.

- A. Object1
- B. Object2
- C. Object3
- D. Object4
- E. Object5

Correct Answer: BCE

QUESTION 7

You need to identify what prevents you from deploying App5 by using a Microsoft Application Virtualization (App-V) package.

What should you identify?

- A. the device drivers
- B. the installer type
- C. the software prerequisites
- D. the application architecture

Correct Answer: A

QUESTION 8

You have a multi-site deployment of Microsoft System Center 2012 R2 Configuration Manager.

You plan to deploy the Configuration Manager client to all client computers in all sites as part of an operating system image.

You need to prepare the reference image.

Which three actions should you perform in sequence before you generalize the image? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Run **client.msi** and specify the *RESETKEYINFORMATION* parameter.
- Run **ccmsetup.exe** and specify the */source* parameter.
- Stop the SMS_EXECUTIVE service.
- Run **ccmsetup.exe** and specify the *RESETKEYINFORMATION* parameter.
- Stop the SMS Agent Host service.

Answer Area

www.Pass4Lead.com

Correct Answer:

Actions

- Run **client.msi** and specify the *RESETKEYINFORMATION* parameter.
- Stop the SMS_EXECUTIVE service.

Answer Area

- Run **ccmsetup.exe** and specify the */source* parameter.
- Stop the SMS Agent Host service.
- Run **ccmsetup.exe** and specify the *RESETKEYINFORMATION* parameter.

QUESTION 9

You need to design a solution to deploy App3.

What should you do?

- A. Publish App3 as a RemoteApp program.
- B. Assign App3 to users by using a Group Policy object (GPO)
- C. Publish App3 as an App-V package.
- D. Install App3 locally on the client computers.

Correct Answer: A

QUESTION 10

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All client computers are configured as Configuration Manager clients.

You have an existing Configuration Manager deployment of an application named App1.

App1 is deployed to a collection that contains the client computers in the engineering department.

From Configuration Manager, you add a new application named App2. App2 will replace App1.

You need to prevent further installations of App1 and to ensure that App2 will be installed on the engineering department computers. App1 must be removed only once App2 is installed.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Retire App1.
- Delete App1.
- Create a deployment that has an uninstall action for App1.
- Create a deployment that has an install action for App2.
- Delete the deployment of App1.

Answer Area

Correct Answer:

Actions

Delete App1.
Delete the deployment of App1.

Answer Area

Retire App1.
Create a deployment that has an install action for App2.
Create a deployment that has an uninstall action for App1.

QUESTION 11

You need to configure the client health settings to meet the compliance requirements. What should you do on the client computers?

- A. Configure the Group Policy preferences.
- B. Run client.msi and specify the DISABLESITEOPT parameter.
- C. Create a configuration baseline.
- D. Run client.msi and specify the NOTIFYONLY parameter.

Correct Answer: D

QUESTION 12

Your network contains one Active Directory domain. The domain contains a deployment of Microsoft System Center 2012 R2 Configuration Manager.

You plan to manage Android devices by using Configuration Manager.

You are evaluating whether to use the Exchange Server connector or Windows Intune to manage the Android devices.

You need to identify which management features are available for the Android devices.

What should you identify? To answer, select the available management features for the Exchange Server connector and for Windows Intune in the answer area.

Hot Area:

Answer Area

Management feature	Available with the Exchange Server connector	Available with Windows Intune
Automatic device discovery	<input type="checkbox"/>	<input type="checkbox"/>
Password enforcement	<input type="checkbox"/>	<input type="checkbox"/>
Remote wipe	<input type="checkbox"/>	<input type="checkbox"/>
Software deployment	<input type="checkbox"/>	<input type="checkbox"/>

Correct Answer:

Answer Area

Management feature	Available with the Exchange Server connector	Available with Windows Intune
Automatic device discovery	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Password enforcement	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Remote wipe	<input checked="" type="checkbox"/>	<input checked="" type="checkbox"/>
Software deployment	<input type="checkbox"/>	<input checked="" type="checkbox"/>

QUESTION 13

You need to implement the Asset Intelligence reports to meet the technical requirement of Customer1. What should you do?

- A. On all client computers, enable success auditing for logon events.
- B. On the primary site server, create a custom client settings object.
- C. On all client computers, enable success auditing for account logon events.
- D. On the primary site server, modify the SMS_def.mof file.

Correct Answer: A

QUESTION 14

You have a deployment of Microsoft System Center 2012 R2 Configuration Manager. All client computers have the Configuration Manager client installed.

You deploy two applications named App1 and App2. App1 is a large application that is used infrequently.

Some users receive notifications indicating low disk space on their client computer.

You need to uninstall App1 from any client computer that has both App1 and App2 installed and that has less than 1GB of free disk space.

What should you do? To answer, select the appropriate options in the answer area.

Hot Area:

Answer Area

Identify computers by:

<input type="checkbox"/>	Creating a configuration item.
<input type="checkbox"/>	Creating a software category.
<input type="checkbox"/>	Creating a software metering rule.
<input type="checkbox"/>	Creating a device collection that uses a query rule.
<input type="checkbox"/>	Creating a user data and profiles configuration item.

Remediation plan:

<input type="checkbox"/>	Retire App1.
<input type="checkbox"/>	Create a deployment for App1.
<input type="checkbox"/>	Create an automatic deployment rule.
<input type="checkbox"/>	Create and deploy an App-V package for App1.

Correct Answer:

Answer Area

Identify computers by:

<input type="checkbox"/>	Creating a configuration item.
<input type="checkbox"/>	Creating a software category.
<input type="checkbox"/>	Creating a software metering rule.
<input checked="" type="checkbox"/>	Creating a device collection that uses a query rule.
<input type="checkbox"/>	Creating a user data and profiles configuration item.

Remediation plan:

<input type="checkbox"/>	Retire App1.
<input checked="" type="checkbox"/>	Create a deployment for App1.
<input type="checkbox"/>	Create an automatic deployment rule.
<input type="checkbox"/>	Create and deploy an App-V package for App1.

QUESTION 15

You need to recommend a solution to resolve the issues reported by the RDS users. What should you include in the recommendation?

- A. Run the Set-RDCertificate cmdlet.
- B. Modify the collection properties.
- C. Modify the RDWeb web application settings.
- D. Modify the RemoteApp program properties.

Correct Answer: A

QUESTION 16

You deploy an application named App1 to all of the users in your company.

You need to change a registry value for App1 for the users in three of the company's departments. Each department will have a different registry value. The solution must remediate any changes to the registry value.

What should you use?

- A. three applications
- B. three packages
- C. one configuration baseline and three configuration items
- D. three configuration baselines and three configuration items

Correct Answer: D

QUESTION 17

You need to recommend a solution to resolve the issues reported by the RDS users. What should you include in the recommendation?

- A. Run the Set-RDCertificate cmdlet.
- B. Modify the collection properties.
- C. Modify the RDWeb web application settings.
- D. Modify the RemoteApp program properties.

Correct Answer: A

QUESTION 18

You have a Windows Intune subscription.

You have 20 client computers that run Windows 8.1 and have the Windows Intune client installed. The computers run an application named Appl.

You create two automatic approval rules. The rules are configured as shown in the following table.

Role name	Product category	Update classification	Deployed to
Rule1	All categories	Security updates	Group1
Rule2	Windows 8.1	Security updates	Group2

You upload an update for App1 named App1_Update1 to Windows Intune and an update named KB2929961 is made available in Windows Intune. The settings of the updates are configured as shown in the following table.

Update name	Classification	Applies to
App1_Update1	Security updates	Custom software package
KB2929961	Security updates	Windows 8.1

You need to identify which groups will receive the updates.

Which groups should you identify? To answer, select the appropriate group for each update in the answer area.

Hot Area:

Answer Area

KB2929961:

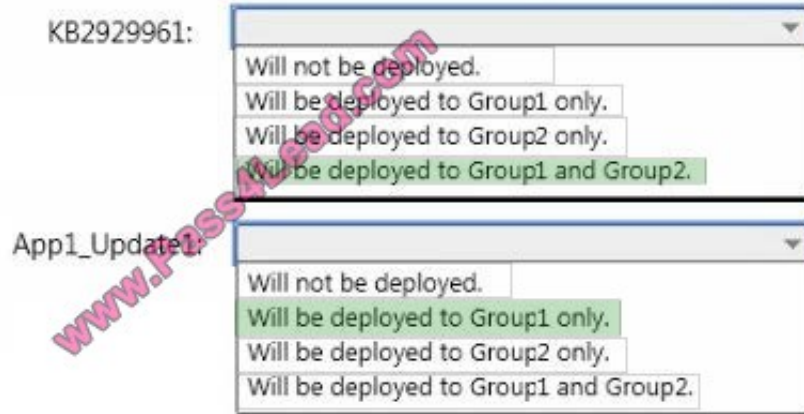

- Will not be deployed.
- Will be deployed to Group1 only.
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2.

App1_Update1:

- Will not be deployed.
- Will be deployed to Group1 only.
- Will be deployed to Group2 only.
- Will be deployed to Group1 and Group2.

Correct Answer:

Answer Area

QUESTION 19

You need to deploy the Configuration Manager client to all of the client computers in the Seattle office.

What is the best deployment method to use? More than one answer choice may achieve the goal. Select the BEST answer.

- A. software update-based
- B. client push
- C. a logon script
- D. manual

Correct Answer: A

<https://technet.microsoft.com/en-gb/library/gg712298.aspx>

QUESTION 20

You need to make App4 available to all of the users. What should you do?

- A. Package App4 as an MSI package and upload the installer to Windows Intune.
- B. Sequence App4 and use streaming delivery.
- C. Deploy App4 as a Configuration Manager package.
- D. Deploy App4 to a Remote Desktop Session Host (RD Session Host) server.

Correct Answer: D
