**Vendor:**EMC

**Exam Code:**E20-120

**Exam Name:**EMC Content Management Foundation  
Exam(CMF)

**Version:**Demo

**QUESTION 1**

Which product allows a user to interact with the repository in the same way that a user can interact with a Windows network drive?

- A. Import Manager
- B. My Documentum for Desktop
- C. Process Integrator
- D. FTP Services

Correct Answer: B

---

**QUESTION 2**

Which statement is true about the communication between the Connection Broker and the Content Server?

- A. The Connection Broker translates communication between client and Content Server protocols.
- B. The Content Server projects its status to the Connection Broker for storage and reference by clients.
- C. The Content Server is polled by the Connection Broker and retrieves status information for use by clients.
- D. The Connection Broker and Content Server challenge requests from clients to ensure proper authentication.

Correct Answer: B

---

**QUESTION 3**

When using a browser, which components are required for accessing Documentum objects in a repository?

- A. Index Server, Content Server
- B. Application Server, Index Server
- C. Application Server, Content Server
- D. Transformation Server, Content Server

Correct Answer: C

---

**QUESTION 4**

By default, against which system component does the Content Server authenticate user accounts?

- A. an LDAP Server

- B. CA SiteMinder
- C. the operating system
- D. Microsoft Active Directory

Correct Answer: C

---

#### **QUESTION 5**

What can provide quick access to frequently referenced objects?

- A. alias set
- B. subscription
- C. replica object
- D. relation object

Correct Answer: B

---

#### **QUESTION 6**

Lifecycles are implemented as an instance of which object type?

- A. dm\_policy
- B. dm\_relation
- C. dm\_lifecycle
- D. dm\_state\_type

Correct Answer: A

---

#### **QUESTION 7**

Which type of organizational structure is used by the Content Server to automatically parse and organize imported compound XML documents?

- A. renditions
- B. lifecycle states
- C. virtual documents
- D. dm\_relation objects

Correct Answer: C

---

### QUESTION 8

Which types of states can a lifecycle contain?

- A. normal and activity
- B. transition and activity
- C. normal and exception
- D. transition and exception

Correct Answer: C

---

### QUESTION 9

Annotations on a document are represented using dm\_relation objects. On the dm\_relation object, both parent\_id and child\_id point to a dm\_sysobject. The object pointed to by the parent\_id is the document and the object pointed to by the child\_id is the annotation. The annotation object is owned by the person who commented on the document.

Which query will return all documents owned by `John Smith` that have annotations along with the name of the user that commented on the document?

- A. `SELECT p.object_name, p.owner_name FROM dm_sysobject p, dm_relation WHERE relation_name='DM_ANNOTATE' AND parent_id=p.r_object_id AND p.r_object_id IN (SELECT r_object_id FROM dm_sysobject WHERE owner_name='John Smith')`
- B. `SELECT p.object_name, c.owner_name FROM dm_sysobject p, dm_sysobject c, dm_relation WHERE relation_name='DM_ANNOTATE' AND parent_id=p.r_object_id AND child_id=c.r_object_id AND p.owner_name='John Smith'`
- C. `SELECT object_name, owner_name FROM dm_sysobject, dm_relation r WHERE r.relation_name='DM_ANNOTATE' AND r.parent_id=r_object_id AND owner_name = 'John Smith'`
- D. `SELECT p.object_name, c.owner_name FROM dm_sysobject p, dm_sysobject c, dm_relation WHERE relation_name='DM_ANNOTATE' AND parent_id=p.r_object_id AND child_id=c.r_object_id UNION select object_name, owner_name FROM dm_sysobject WHERE owner_name='John Smith'`

Correct Answer: B

---

### QUESTION 10

Which object type can be given a default alias set?

- A. Docbase Config (dm\_docbase\_config)
- B. Server Config (dm\_server\_config)
- C. Type (dm\_type)
- D. Package (dmi\_package)

Correct Answer: B

---

**QUESTION 11**

Which DQL statement is used to run server methods?

- A. REGISTER
- B. COMMIT
- C. EXECUTE
- D. BEGIN

Correct Answer: C

---

**QUESTION 12**

Aliases can be used for which type of placeholder?

- A. keywords
- B. user names
- C. object names
- D. email addresses

Correct Answer: B
