**Exam Name:**SAP Certified Application Associate -  
Modeling and Data Management with SAP BW 7.4

**Version:**Demo

### QUESTION 1

You are executing a process chain to load transaction data from an SAP source system via a standard DSO into an InfoCube but NO DATA arrives in the InfoCube. What are possible reasons for this? (2)

- A. The data does NOT meet the selection criteria of the DTP
- B. The data comprises an error and the error handling setting is set to "Cancel Request, Do Not Track Records, No Update"
- C. The Data Flow object has NOT been activated
- D. The Integrity check is NOT switched on in the transformations

Correct Answer: AB

---

### QUESTION 2

What can you do in the remodeling toolbox? (3)

- A. Convert an InfoCube dimension to a line-item dimension
- B. Change the standard aggregation of the key figure
- C. Delete a characteristic
- D. Change the reference characteristic
- E. Delete a characteristic of an InfoCube

Correct Answer: ACE

---

### QUESTION 3

Which of the following are true regarding DB and UD Connect technologies? There are 2 correct answers.

- A. UD Connect contains an inherent "Group By" clause.
- B. UD Connect requires ABAP connectors.
- C. DB Connect normally reduces the granularity of the data.
- D. DB Connect requires the potential use of a Database Shared Library.

Correct Answer: AD

---

### QUESTION 4

You are not able to delete a request from a DSO. What best describes the situation? Select the correct answer

- A. The request has been compressed.
- B. The request is contained in an Aggregate.
- C. The request is contained in a subsequent InfoProvider.
- D. The request must be deleted selectively.

Correct Answer: C

---

#### **QUESTION 5**

When is the Change Run required after successful completion of a master data load? Select the best answer.

- A. When changes are made to texts from Characteristics used in an Aggregate.
- B. When changes are made to attributes or hierarchies from Characteristics used in an Aggregate.
- C. When changes are made to attributes, hierarchies or texts from Characteristics used in an Aggregate.
- D. When changes are made to the structure of the InfoCube.

Correct Answer: B

---

#### **QUESTION 6**

After transporting BEx workbooks to production from development, users state that they cannot find the workbooks. What would be the most logical reason? Select the correct answer.

- A. The BEx workbooks are not active in production.
- B. The users\' roles have to be updated in production.
- C. The BEx workbooks have not been authorized.
- D. The users\' roles have to be re-transported.

Correct Answer: D

---

#### **QUESTION 7**

A Business Content transactional Datasource that uses delta queue processing was converted to Real Time Data Acquisition. An analysis reveals that no new deltas are being transferred into SAP BW 7.x, even though documents are regularly created in the SAP source system delta queue. What tools could you use? There are 2 correct answers.

- A. Process Chain Monitor
- B. Extractor Checker in SAP ECC
- C. SAP BW Delta Queue

D. Data Load Monitor

Correct Answer: BD

---

### QUESTION 8

How can BI Content be used in a SAP BW implementation? (2)

- A. Enable Business Blueprint and Realization
- B. Eliminate the need for requirements analysis
- C. Replaces analysis and data modeling
- D. Continuous improvement after go-live

Correct Answer: AD

---

### QUESTION 9

Which of the following objects can you use as a source objects for a Transformation object? (2)

- A. Transient Provider
- B. InfoSet
- C. Open Hub Destination
- D. InfoSource
- E. InfoSet

Correct Answer: D

---

### QUESTION 10

Your InfoCube contains the following Key Figures: Planned Amount, Budgeted Amount, Forecasted Amount, Planned Quantity, Budgeted Quantity and Forecasted Quantity. You want to reduce the number of Key Figures to only Amount and Quantity and still retain the uniqueness of key figure values? How can you accomplish this? There are 2 correct answers.

- A. Create a new Dimension table containing a Characteristic to distinguish the key figure types.
- B. Create three InfoCubes; one each for Planned, Budgeted and Forecasted key figure values.
- C. Create Key Figures Amount and Quantity as non-cumulatives with virtual key figures to calculate the different types.
- D. Use the Select option "Unique for Every Cell" in the distinguishing Characteristic.

Correct Answer: AD

---

### QUESTION 11

You have added the fields "ZCOUNTRY" and "ZLOCALITY" to the DataSource, 0CUSTOMER\_ATTR . Which of the following is necessary to ensure that the new fields can be extracted from the source system into PSA of the DataSource in SAP BW. Select the correct answer.

- A. All target InfoProviders must be active and connected.
- B. All target InfoProviders must have their table space increased.
- C. All fields of 0CUSTOMER\_ATTR have been mapped.
- D. All active customer ABAP enhancements of 0CUSTOMER\_ATTR are active

Correct Answer: D

---

### QUESTION 12

An InfoCube has been designed with 2 user-defined Dimensions containing 1 and 3 Characteristics respectively. All InfoObjects have the same level of master data value cardinality. How can you change the design of the InfoCube to optimize performance? Select the correct answer.

- A. Put all Characteristics in a single user-defined Dimension.
- B. Distribute the InfoObjects unevenly between the Dimensions.
- C. Make the single InfoObject the one Dimension the key of the InfoCube.
- D. Create 2 more Dimensions so that each has only 1 InfoObject.

Correct Answer: D
