**Vendor:**CA

**Exam Code:**CAT-440

**Exam Name:**CA Performance Management r2.x  
Professional Exam

**Version:**Demo

**QUESTION 1**

When you configure event notifications, which factor should you always consider?

- A. Other users might be able to view the notifications.
- B. The action to delete notifications does not affect actual or future events.
- C. Notifications will continue to appear when the Event Manager is set to disabled.
- D. CA Performance Management needs to be configured to use port 162 to send traps.

Correct Answer: B

---

**QUESTION 2**

When you edit vendor certifications using the New Vendor Certification wizard, which action can you perform?

- A. Change the priority of custom vendor certifications.
- B. Modify metric expressions in custom vendor certifications.
- C. Add metric expressions to out-of-the box vendor certifications.
- D. Change the name and description of custom vendor certifications.

Correct Answer: B

---

**QUESTION 3**

In CA Performance Center, groups are organized in the Groups Tree. Which features characterize the Groups Tree?  
(Choose two)

- A. Its root level is called the Root Group node.
- B. It is used when an administrator manages groups.
- C. It includes the Defined Tenants sub-tree for groups in a tenant space.
- D. It includes a sub-node in the Defined Tenants sub-tree for Default Space groups.

Correct Answer: BC

---

**QUESTION 4**

In CA Performance Management, metric families are used to tie the vendor certifications to:

- A. Monitoring profiles

- B. Tenant groups
- C. SNMP profiles
- D. IPdomains

Correct Answer: A

---

#### **QUESTION 5**

In which order are the following CA Performance Management components installed?

1.  
Data Collector
2.  
Data Repository
3.  
Data Aggregator
4.  
CA Performance Center

- A. 1,2,3,4
- B. 2,3,4,1
- C. 3,1,2,4
- D. 4,3,1,2

Correct Answer: B

---

#### **QUESTION 6**

When you are editing a monitoring profile for the first time, you notice that the default detection rate is zero and the Update Metric Families check box is selected. How does this affect how the Data Aggregator monitors device reconfiguration?

- A. Device configuration will be set to false.
- B. Device configuration changes will be ignored.
- C. Device configuration changes will be immediately updated upon detection.
- D. Device reconfiguration will be checked when changes to the metric family occur.

Correct Answer: C

---

**QUESTION 7**

Regardless of the deployment size, for CA Performance Center installations:

- A. the CPU must be quad core and at least 1 GHz.
- B. the web browser you use must run in Compatibility mode.
- C. you must use a 32-bit version of Red Hat Enterprise Linux.
- D. you must have 1 GB of free disk space in the /tmp directory and at least 40 GB of free disk space for the database.

Correct Answer: D

---

**QUESTION 8**

Which step enables you to validate the installation of CA Performance Center?

- A. Check that the Vertica database can be stopped and restarted.
- B. Run `ps-aef | grep java` and examine the running java processes.
- C. Check that the Data Collectors are able to connect to the MySQL database.
- D. Successfully log in to the CA Performance Center console from a supported web browser.

Correct Answer: D

---

**QUESTION 9**

When you create or edit a monitoring profile, you can use the Change Detection Rate option to set the frequency at which the Data Aggregator checks for changes. When you set the rate of detection, the Automatically Update Metric Families check box is selected by default. What happens if you clear this check box?

- A. The Change Detection Rate field will no longer be editable.
- B. The automatic updating of metric families will continue unless you also change settings for specific metric families.
- C. The Data Aggregator will continue to automatically monitor new components but will no longer retire old components.
- D. The Events Display dashboard will need to be monitored and updates will need to be performed manually on the Polled Metric Families page.

Correct Answer: D

---

**QUESTION 10**

Sue White logs into CA Performance Center as the Global Administrator. When Sue uses the Admin menu to administer

a tenant:

- A. she is granted a tenant user perspective.
- B. she will be able to view all tenant spaces.
- C. she will only be able to view Default Space items.
- D. she is granted a tenant administrator perspective.

Correct Answer: D

---

### QUESTION 11

When you are creating custom dashboards, which factors should you consider? (Choose three)

- A. Out-of-the-box templates are available to help you organize multiple views.
- B. The Add Dashboard button on the Available Dashboards page is visible to all users by default.
- C. If you need to display more than two views, best practice is to use multiple pages on your dashboard.
- D. The workflows for creating new dashboards and for customizing the out-of-the-box dashboards are essentially the same.
- E. Views are generally selected from the Custom View

Correct Answer: ADE

---

### QUESTION 12

You are installing the Data Repository in a clustered configuration. What is the minimum number of hosts that you can use for your cluster?

- A. Two
- B. Three
- C. Four
- D. Five

Correct Answer: B
