Vendor: Dell

Exam Code:DC0-261

Exam Name: Dell Storage Networking Professional
Exam - Version 2

Version: Demo

QUESTION 1

Which three statements about the CX300 are true. (Choose three.)

A. Additional DAEs are attached by cabling the EXP port to the PRI port.

B. The back-end connector on the Disk Processor Enclosure connects to the EXP connector on the DAE2.

C. The Enclosure Address Switch on the first DAE2 is set to 1.

D. The back-end connector on the DPE connects to the PRI connector on the DAE2.

Correct Answer: ACD

QUESTION 2

Which component of a Dell / EMC Storage Area Network (SAN) provides port bypass circuitry for failed drives and also monitors environmental conditions?

A. Disk Processor Enclosure

B. Link Controller Card

C. Storage Processor Enclosure

D. Disk Array Enclosure

Correct Answer: B

QUESTION 3

For maximum availability, what is the minimum number of paths required?

A. 2

B. 1

C. 4

D. 3

Correct Answer: A

QUESTION 4

In a Dell / EMC only Storage Area Network (SAN), SAN Copy requires which three of the following? (Choose three.)

A. SnapView or MirrorView must be installed on the storage array running SAN Copy.

B. TheNavisphere Host Agent does not need to be installed on all hosts that own LUNs to be SAN copied.

C. AccessLogix must be running on all participating storage arrays.

D. All SAN Copy ports must be zoned correctly, in order for SAN Copy to have access to these storage arrays.

E. Either the Source or Destination logical units must reside on an array running SAN Copy.

Correct Answer: CDE

QUESTION 5

Which three statements are correct about SAN Copy admhost ? (Choose three.)

A. In order to scan and mount a new copy LUN, theadmhost lun_activate command can be utilized.

B. Theadmhost utility is installed on a CX500 or CX700 storage array.

C. Theadmhost utility can only be installed and run on Windows hosts.

D. Admhost is an executable program that can be run interactively via script.

Correct Answer: ACD

QUESTION 6

Where on the Storage Area Network (SAN) should PowerPath be installed?

A. on any device that accesses the SAN

B. on each fabric switch

C. on each host server

D. on the storage array

Correct Answer: C

QUESTION 7

What is the function of a Storage Group?

A. enable virtual expansion of RAID Groups

B. provide sharing of a LUN between both Storage Processors

C. enable heterogeneous hosts to access the same LUN

D. protect data from access by unauthorized hosts

Correct Answer: D

QUESTION 8

Which function can SAN Copy perform that SnapView cannot?

A. SAN Copy can create a point-in-time copy of a LUN.

B. SAN Copy can copy a snapshot, clone, or LUN from one storage array to another.

C. SAN Copy can make snapshots or clones of LUNs.

D. SAN Copy can synchronously mirror a LUN from one storage array to another.

Correct Answer: B

QUESTION 9

You have installed SAN Copy. Which statement is true?

A. Any LUN within the SAN is automatically made available to be copied.

B. Theadmhost utility must be installed on each storage array that Navisphere Manager resides on.

C. SAN Copy sessions can be managed through theNavisphere Manager Enterprise Storage window.

D. SAN Copy cannot be upgraded, except by a complete re-install.

E. The storage array must be rebooted.

Correct Answer: C

QUESTION 10

Which two are components of the CX500 Disk Processing Enclosure? (Choose two.)

A. dual hot-swappable link control cards

B. dual hot-swappable storage processors

C. 15 hot-swappable 1-inch disk drives

D. three hot-swappable power supply / cooling modules

Correct Answer: BC

QUESTION 11

Which three tools can help eliminate single-points-of-failure of data instances? (Choose three.)

A. SAN Copy

B. Analyzer

C. Navisphere Manager

D. MirrorView

E. SnapView

F. CloneView

Correct Answer: ADE

QUESTION 12

How many Disk Array Enclosure 2s (DAE2s) can be connected to a CX500?

A. 7

B. 5

C. 6

D. 8

Correct Answer: A
