Vendor: Salesforce

Exam Code:IDENTITY-AND-ACCESS-MANAGEMENT-ARCHITECT

Exam Name: Salesforce Certified Identity and Access Management Architect

Version: Demo

QUESTION 1

Universal Containers want users to be able to log in to the Salesforce mobile app with their Active Directory password. Employees are unable to use mobile VPN.

Which two options should an identity architect recommend to meet the requirement?

Choose 2 answers

A. Active Directory Password Sync Plugin

B. Configure Cloud Provider Load Balancer

C. Salesforce Trigger and Field on Contact Object

D. Salesforce Identity Connect

Correct Answer: AD

QUESTION 2

A farming enterprise offers smart farming technology to its farmer customers, which includes a variety of sensors for livestock tracking, pest monitoring, climate monitoring etc. They plan to store all the data in Salesforce. They would also like to ensure timely maintenance of the Installed sensors. They have engaged a salesforce Architect to propose an appropriate way to generate sensor Information In Salesforce.

Which OAuth flow should the architect recommend?

A. OAuth 2.0 Asset Token Flow

B. OAuth 2.0 Device Authentication Row

C. OAuth 2.0 JWT Bearer Token Flow

D. OAuth 2.0 SAML Bearer Assertion Flow

Correct Answer: A

QUESTION 3

Universal Containers (UC) is building an integration between Salesforce and a legacy web applications using the canvas framework. The security for UC has determined that a signed request from Salesforce is not an adequate authentication solution for the Third-Party app. Which two options should the Architect consider for authenticating the third-party app using the canvas framework? Choose 2 Answers

A. Utilize the SAML Single Sign-on flow to allow the third-party to authenticate itself against UC\\'s IdP.

B. Utilize Authorization Providers to allow the third-party appliction to authenticate itself against Salesforce as the Idp.

C. Utilize Canvas OAuth flow to allow the third-party appliction to authenticate itself against Salesforce as the Idp.

D. Create a registration handler Apex class to allow the third-party appliction to authenticate itself against Salesforce as the Idp.

Correct Answer: AC

QUESTION 4

What item should an Architect consider when designing a Delegated Authentication implementation?

A. The Web service should be secured with TLS using Salesforce trusted certificates.

B. The Web service should be able to accept one to four input method parameters.

C. The web service should use the Salesforce Federation ID to identify the user.

D. The Web service should implement a custom password decryption method.

Correct Answer: A

QUESTION 5

Universal Containers (UC) has a classified information system that its call center team uses only when they are working on a case with a record type "Classified". They are only allowed to access the system when they own an open "Classified" case, and their access to the system is removed at all other times. They would like to implement SAML SSO eith Salesforce as the Idp, and automatically allow or deny the staff\'s access to the classified information system based on whether they currently own an open "Classified" case record when they try to access the system using SSO. What is the recommended solution for automatically allowing or denying the access to the classified information system based on the open "classified" case record criteria?

A. Use Salesforce reports to identify users that currently owns open "Classified" cases and should be granted access to the Classified information system.

B. Use Apex trigger on case to dynamically assign permission Sets that Grant access when an user is assigned with an open "Classified" case, and remove it when the case is closed.

C. Use Custom SAML JIT Provisioning to dynamically query the user\'s open "Classified" cases when attempting to access the classified information system.

D. Use a Common Connected App Handler using Apex to dynamically allow access to the system based on whether the staff owns any open "Classified" Cases.

Correct Answer: D

QUESTION 6

Universal Containers (UC) is using Active Directory as its corporate identity provider and Salesforce as its CRM for customer care agents, who use SAML based sign sign-on to login to Salesforce. The default agent profile does not include the Manage User permission. UC wants to dynamically update the agent role and permission sets.

Which two mechanisms are used to provision agents with the appropriate permissions?

Choose 2 answers

A. Use Login Flow in User Context to update role and permission sets.

B. Use Login Flow in System Context to update role and permission sets.

C. Use SAML Just-m-Time (JIT) Handler class run as current user to update role and permission sets.

D. Use SAML Just-in-Time (JIT) handler class run as an admin user to update role and permission sets.

Correct Answer: BD

QUESTION 7

Universal Containers is implementing a new Experience Cloud site and the identity architect wants to use dynamic branding features as of the login process.

Which two options should the identity architect recommend to support dynamic branding for the site?

Choose 2 answers

A. To use dynamic branding, the community must be built with the Visuaiforce + Salesforce Tabs template.

B. To use dynamic branding, the community must be built with the Customer Account Portal template.

C. An experience ID (expid) or placeholder parameter must be used in the URL to represent the brand.

D. An external content management system (CMS) must be used for dynamic branding on Experience Cloud sites.

Correct Answer: BC

QUESTION 8

Universal Container\\'s (UC) identity architect needs to recommend a license type for their new Experience Cloud site that will be used by external partners (delivery providers) for reviewing and updating their accounts, downloading files provided by UC and obtaining scheduled pickup dates from their calendar.

UC is using their Salesforce production org as the identity provider for these users and the expected number of individual users is 2.5 million with 13.5 million unique logins per month.

Which of the following license types should be used to meet the requirement?

A. External Apps License

B. Partner Community License

C. Partner Community Login License

D. Customer Community plus Login License

Correct Answer: D

QUESTION 9

Universal Containers (UC) wants to build a few applications that leverage the Salesforce REST API. UC has asked its Architect to describe how the API calls will be authenticated to a specific user. Which two mechanisms can the Architect provide? Choose 2 Answers

A. Authentication Token

B. Session ID

C. Refresh Token

D. Access Token

Correct Answer: CD

QUESTION 10

Universal containers (UC) has implemented SAML -based single Sign-on for their salesforce application. UC is using pingfederate as the Identity provider. To access salesforce, Users usually navigate to a bookmarked link to my domain URL. What type of single Sign-on is this?

A. Sp-Initiated

B. IDP-initiated with deep linking

C. IDP-initiated

D. Web server flow.

Correct Answer: A

QUESTION 11

A global fitness equipment manufacturer is planning to sell fitness tracking devices and has the following requirements:

1) Customer purchases the device.

2) Customer registers the device using their mobile app.

3) A case should automatically be created in Salesforce and associated with the customers account in cases where the device registers issues with tracking.

Which OAuth flow should be used to meet these requirements?

A. OAuth 2.0 Asset Token Flow

B. OAuth 2.0 Username-Password Flow

C. OAuth 2.0 User-Agent Flow

D. OAuth 2.0 SAML Bearer Assertion Flow

Correct Answer: A

QUESTION 12

Sales users at Universal containers use salesforce for Opportunity management. Marketing uses a third-party application called Nest for Lead nurturing that is accessed using username/password. The VP of sales wants to open up access to nest for all sales uses to provide them access to lead history and would like SSO for better adoption. Salesforce is already setup for SSO and uses Delegated Authentication. Nest can accept username/Password or SAML-based Authentication. IT teams have received multiple password-related issues for nest and have decided to set up SSO access for Nest for Marketing users as well. The CIO does not want to invest in a new IDP solution and is considering using Salesforce for this purpose.

Which are appropriate license type choices for sales and marketing users, giving salesforce is using Delegated Authentication? Choose 2 answers

A. Salesforce license for sales users and Identity license for Marketing users

B. Salesforce license for sales users and External Identity license for Marketing users

C. Identity license for sales users and Identity connect license for Marketing users D. Salesforce license for sales users and platform license for Marketing users.

Correct Answer: AD
