

**100%** Money Back  
**Guarantee**

**Vendor:**Palo Alto Networks

**Exam Code:**PCCSA

**Exam Name:**Palo Alto Networks Certified  
Cybersecurity Associate

**Version:**Demo

**QUESTION 1**

What does a hypervisor enable?

- A. high-speed searching of already aggregated security log files
- B. high-speed aggregation and viewing of security log files
- C. multiple physical machines to be configured into a high-performance cluster
- D. multiple guest operating systems to run on a single physical machine

Correct Answer: D

---

**QUESTION 2**

A firewall located on an organization's network perimeter can be used to protect against which type of attack?

- A. a malicious SaaS application file accessed from an unmanaged mobile phone
- B. ransomware installed from an infected USB drive
- C. malware installed on the laptop by a disgruntled employee
- D. a malicious PDF file located on an internet website

Correct Answer: D

---

**QUESTION 3**

Which type of cloud computing deployment makes resources exclusively available to members of a single organization?

- A. local
- B. private
- C. hybrid
- D. public

Correct Answer: B

---

**QUESTION 4**

Review the exhibit and identify the type of vulnerability or attack that is commonly used against this technology.

Channel:

Auto 

Mode:

Up to 54 Mbps 

---

### Security Options

- None
- WEP
- WPA-PSK [TKIP]

- A. phishing
- B. denial-of-service
- C. code-injection
- D. password cracking

Correct Answer: D

---

### QUESTION 5

To which type of organization does the PCI DSS apply?

- A. any organization that accepts, transmits, or stores any cardholder data
- B. organizations that only accept cardholder data regardless of size or number of transactions
- C. only organization larger than 100 employees that accept, transmit, or store any cardholder data
- D. organization that only transmit data regardless of size or number of transactions

Correct Answer: A

---

### QUESTION 6

Which security principle describes the practice of giving users the minimum rights to access the resources necessary to do their jobs?

- A. known privilege
- B. least privilege
- C. user privilege
- D. lowest privilege

Correct Answer: B

---

**QUESTION 7**

During which step of the cyber-attack lifecycle is a user's web browser redirected to a webpage that automatically downloads malware to the endpoint?

- A. delivery
- B. weaponization
- C. reconnaissance
- D. command-and-control

Correct Answer: A

---

**QUESTION 8**

In which type of cloud computing service does an organization own and control application data, but not the application?

- A. platform as a service
- B. computing as a service
- C. infrastructure as a service
- D. software as a service

Correct Answer: D

---

**QUESTION 9**

From which resource can a Palo Alto Networks firewall get URL category information for URLs whose categories cannot be found on the firewall?

- A. App-ID database
- B. WildFire
- C. PDF file
- D. PAN-DB database

Correct Answer: D

---

**QUESTION 10**

DRAG DROP

Match the common TCP/IP protocol with its corresponding port(s).

Select and Place:

22	Drag answer here	File Transfer Protocol (FTP)
23	Drag answer here	Domain Name System (DNS)
67/68	Drag answer here	Telnet
20/21	Drag answer here	Secure Shell (SSH)
25	Drag answer here	Dynamic Host Configuration Protocol (DHCP)
53	Drag answer here	Simple Mail Transfer Protocol (SMTP)

Correct Answer:

22	Secure Shell (SSH)	
23	Telnet	
67/68	Dynamic Host Configuration Protocol (DHCP)	
20/21	File Transfer Protocol (FTP)	
25	Simple Mail Transfer Protocol (SMTP)	
53	Domain Name System (DNS)	

---

### QUESTION 11

Identify a weakness of a perimeter-based network security strategy to protect an organization's endpoint systems.

- A. It cannot identify command-and-control traffic.
- B. It cannot monitor all potential network ports.
- C. It assumes that all internal devices are untrusted.
- D. It assumes that every internal endpoint can be trusted.

Correct Answer: D

---

### QUESTION 12

Which security component should you configure to block viruses not seen and blocked by the perimeter firewall?

- A. strong endpoint passwords
- B. endpoint disk encryption
- C. endpoint antivirus software
- D. endpoint NIC ACLs

Correct Answer: C
