Vendor:Microsoft

Exam Code:PL-900

Exam Name:Microsoft Power Platform Fundamentals

Version:Demo

QUESTION 1

A company manages a chain of retail stores. The company stores a list of retail store names and numbers in one Power BI table. The company stores sales transaction data including a transaction ID in another table. The transaction ID includes the store number.

You need to show the store name for all retail transactions in all Power BI reports.

Which tool should you use?

- A. Query Editor
- B. Power BI Service
- C. Microsoft Excel
- D. Data Connector

Correct Answer: A

Power BI Desktop comes with Query Editor, where you can connect to one or many data sources, shape and transform the data to meet your needs, then load that model into Power BI Desktop.

Reference: <https://docs.microsoft.com/en-us/power-bi/desktop-query-overview>

QUESTION 2

DRAG DROP

A customer service department uses Microsoft Dynamics 365 Customer Service to manage repair requests. The repair team tracks their efforts using a Microsoft SharePoint list. The company must use Microsoft Power Platform to connect the repair team with the Dynamics 365 Customer Service solution. The solution must meet the following requirements:

Requirement Number	Requirement
Requirement 1	From a custom page in the Dynamics 365 interface, allow the customer service team to input a repair number, view the details of the corresponding SharePoint list item, and add notes for the repair team.
Requirement 2	Create a report that visualizes real-time customer service information that the repair team can access online and use to create dashboards.
Requirement 3	Automatically send a Microsoft Teams message to a customer service agent and an email to the customer when a repair team member completes a repair.

Requirement 1:

From a custom page in the Dynamics 365 interface, allow the customer service team to input a repair number, view the details of the corresponding SharePoint list item, and add notes for the repair team.

Requirement 2:

Create a report that visualizes real-time customer service information that the repair team can access online and use to create dashboards.

Requirement 3:

Automatically send a Microsoft Teams message to a customer service agent and an email to the customer when a repair team member completes a repair.

You need to implement the appropriate technologies to meet the requirements.

Which technologies should you use? To answer, drag the appropriate technologies to the correct scenarios. Each technology may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to

view content

NOTE: Each correct selection is worth one point.

Select and Place:

Technologies

- Microsoft Power BI
- Canvas app
- Microsoft Power Automate
- Microsoft Power Virtual Agents chatbot

Answer Area

Scenario	Technology
Requirement1	
Requirement2	
Requirement3	

Correct Answer:

Technologies

Microsoft Power Virtual Agents chatbot

Answer Area

Scenario	Technology
Reqirement1	Canvas app
Reqirement2	Microsoft Power BI
Reqirement3	Microsoft Power Automate

QUESTION 3

This question requires that you evaluate the underlined text to determine if it is correct.

You have a Power Apps app. You create a new version of the app and then publish the new version. A customer goes through the process of restoring the previous version of the app. In the Version tab for the app, you will see two versions of the app.

Review the underlined text. If it makes the statement correct, select "No change is needed." If the statement is incorrect, select the answer choice that makes the statement correct.

A. No change is needed.

- B. one
- C. three
- D. four

Correct Answer: C

Restore a canvas app to a previous version in PowerApps.

1.

Open powerapps.com, and then click or tap Apps in the left navigation bar.

2.

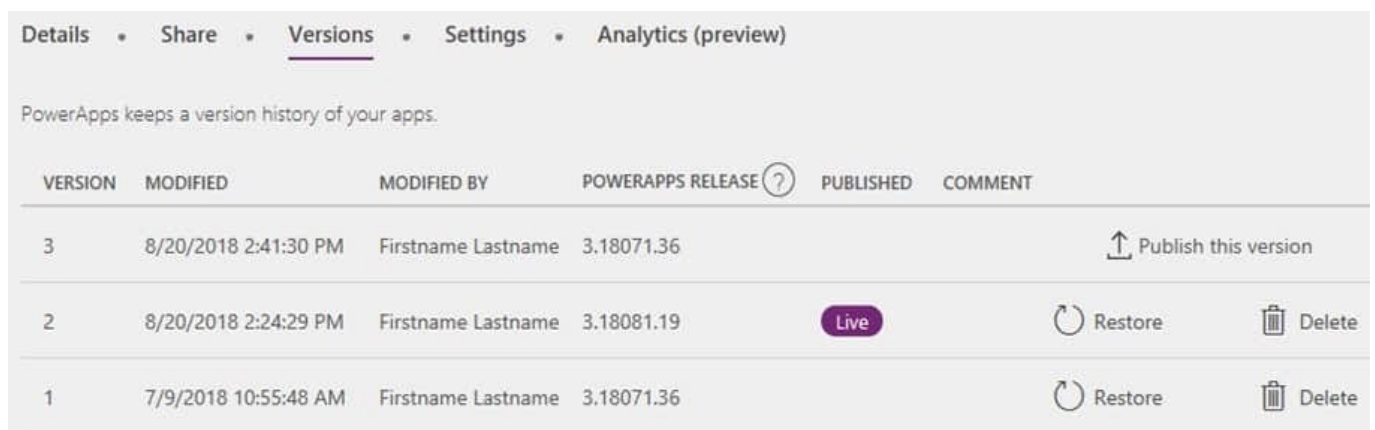

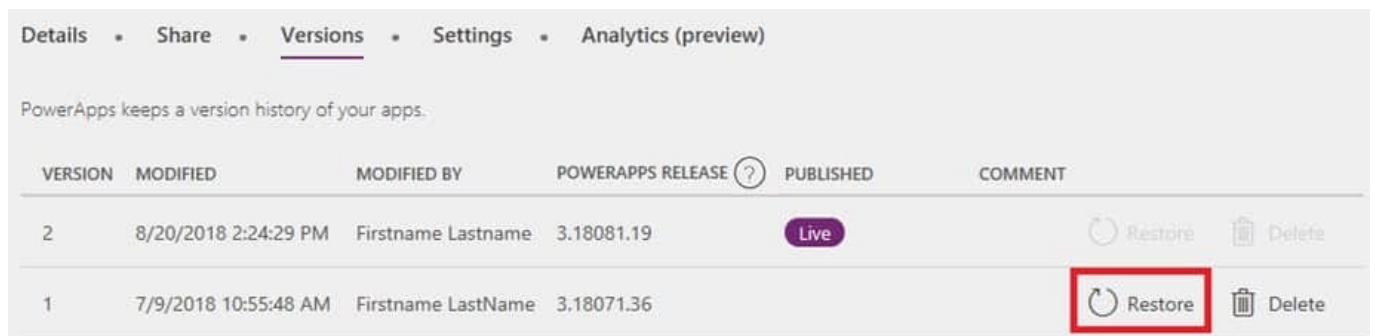

Near the right edge, click or tap the info icon for the app that you want to restore.

3.

Click or tap the Versions tab, and then click or tap Restore for the version that you want to restore.

4.

In the confirmation dialog box, click or tap Restore. A new version is added to your list.

Reference: <https://docs.microsoft.com/en-us/powerapps/maker/canvas-apps/restore-an-app>

QUESTION 4

HOTSPOT

You are learning about Power Apps and how to use triggers.

Which objects should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statement

Component

When a condition is met, Power Apps app can trigger a

	▼
connector.	
Power Automate flow.	
gateway.	
solution.	

Actions and triggers are properties of a

	▼
connector.	
gateway.	
solution.	

Correct Answer:

Answer Area

Statement

Component

When a condition is met, Power Apps app can trigger a

	▼
connector.	
Power Automate flow.	
gateway.	
solution.	

Actions and triggers are properties of a

	▼
connector.	
gateway.	
solution.	

Box 1: connector

A connection is a proxy or a wrapper around an API that allows the underlying service to talk to Microsoft Power Automate, Microsoft Power Apps, and Azure Logic Apps. It provides a way for users to connect their accounts and use a set of

pre-built actions and triggers to build their apps and workflows.

Power Automate offers connectors (apps/services like SharePoint, Outlook, /.) and most connectors offer prebuilt triggers that you can use to start your flows.

Box 2: solution

If you're creating an action to include as part of a solution that will be distributed, create it in the context of the solution. Go to Settings > Solutions and locate the unmanaged solution that this action will be part of.

<https://docs.microsoft.com/en-us/connectors/connectors>

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/configure-actions>

QUESTION 5

HOTSPOT

Instructions: For each of the following statements, select Yes if the statement is true. Otherwise, select No. NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements

Yes No

You can connect to external resources with Power BI Desktop but not with the Power BI service.

You can build and edit Power BI reports by using Power BI Desktop or the Power BI service.

The only way to distribute a Power BI Desktop report is by sending the PBIX file to others.

Correct Answer:

Answer Area

Statements

Yes No

You can connect to external resources with Power BI Desktop but not with the Power BI service.

You can build and edit Power BI reports by using Power BI Desktop or the Power BI service.

The only way to distribute a Power BI Desktop report is by sending the PBIX file to others.

Power BI Desktop and the Power BI service both allow you to connect to external resources such as databases, web services, and Excel files. So it is not true that you can connect to external resources with Power BI Desktop but not with the Power BI service.

Power BI Desktop and the Power BI service both allow you to build and edit Power BI reports. This statement is true.

You can distribute a Power BI Desktop report by publishing it to the Power BI service, which allows others to access the report online. You can also share the report by sending the PBIX file to others or by embedding the report on a website. So it is not true that the only way to distribute a Power BI Desktop report is by sending the PBIX file to others.

QUESTION 6

A company uses Dynamics 365 Sales. Every time an opportunity is created, a Power Automate flow runs to email the opportunity to the sales manager.

The sales manager leaves the company. You disable all accounts for the sales manager.

You need to ensure that the new sales manager automatically receives email about opportunities when they are created.

What should you do?

- A. Modify the flow and ensure that the correct manager's email is listed in the From field.
- B. Modify the flow and ensure that the correct manager's email is listed in the To field.
- C. Grant the new sales manager access to the departed sales manager's inbox.
- D. Modify the flow and ensure that the flow prompts the user to type the correct email for the To field.
- E. Create a flow that automatically forwards opportunity emails to the new sales manager.

Correct Answer: B

Reference: <https://www.inogic.com/blog/2020/09/power-automate-send-an-email-using-the-email-template-part-1/>

QUESTION 7

You are using the Power BI service to view a visual on a report that has been shared with you.

You need to add the visual to a dashboard as a tile.

Which action should you perform?

- A. Copy
- B. Spotlight
- C. Export data
- D. Pin

Correct Answer: D

An entire report page can be pinned to a dashboard, which is called pinning a live tile. It's called a live tile because you can interact with the tile on the dashboard.

Unlike with individual visualization tiles, changes made in the report are automatically synced with the dashboard.

Reference:

<https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-tile-from-report>

QUESTION 8

You create a multi-page Power BI report for an organization.

You must enable salespeople in the organization to use the report to view data relevant to their sales region only.

You need to enable security for the report.

What should you use?

- A. Microsoft Trust Center
- B. row-level security
- C. data loss prevention policies
- D. sensitivity labels
- E. Microsoft Azure Active Directory

Correct Answer: B

Row-level security (RLS) with Power BI can be used to restrict data access for given users. Filters restrict data access at the row level, and you can define filters within roles. In the Power BI service, members of a workspace have access to

datasets in the workspace. RLS doesn't restrict this data access.

You can configure RLS for data models imported into Power BI with Power BI Desktop. You can also configure RLS on datasets that are using DirectQuery, such as SQL Server. For Analysis Services or Azure Analysis Services lives

connections, you configure Row-level security in the model, not in Power BI Desktop.

Reference:

<https://docs.microsoft.com/en-us/power-bi/enterprise/service-admin-rls>

QUESTION 9

DRAG DROP

You create a Power BI dashboard.

Match each option to its requirement. To answer, drag the appropriate option from the column on the left to the correct requirement on the right. Each option may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point.

Select and Place:

Share	Embed	Get Data	Pin
--------------	--------------	-----------------	------------

Ensure that coworkers can see the dashboard.	Option
Display data from Microsoft Excel in the dashboard.	Option
Add a report tile to the dashboard.	Option

Correct Answer:

Embed

Ensure that coworkers can see the dashboard.	Share
Display data from Microsoft Excel in the dashboard.	Get Data
Add a report tile to the dashboard.	Pin

QUESTION 10

You are a sales representative. You create a Power BI report to visualize data from a Microsoft Excel workbook.

Users need to be able to view and share the report.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Pin the report to a dashboard.
- B. Export the data.
- C. Publish the dashboard.
- D. Share the dashboard.

Correct Answer: AD

Reference: <https://docs.microsoft.com/en-us/power-bi/create-reports/service-dashboard-pin-live-tile-from-report>
<https://docs.microsoft.com/en-us/power-bi/collaborate-share/service-share-dashboards#limitations-and-considerations>

QUESTION 11

You are building a Power Virtual Agents chatbot for a company.

You are working with an existing topic and would like to call an action.

Which technology is available to perform the action?

- A. Power Virtual Agent Entity
- B. Power Apps
- C. Power Automate
- D. Power BI

Correct Answer: C

Reference: <https://docs.microsoft.com/en-us/power-virtual-agents/advanced-flow>

QUESTION 12

HOTSPOT

You are authoring a Power Virtual Agents chatbot for a company.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
You must create a custom action to display a knowledge base article that answers a common support question.	<input type="radio"/>	<input type="radio"/>
You can use Power Automate to retrieve a customer's contact number in order to verify they are an authorized user and their support plan SLA.	<input type="radio"/>	<input type="radio"/>

Correct Answer:

Answer Area

Statements	Yes	No
You must create a custom action to display a knowledge base article that answers a common support question.	<input type="radio"/>	<input checked="" type="radio"/>
You can use Power Automate to retrieve a customer's contact number in order to verify they are an authorized user and their support plan SLA.	<input checked="" type="radio"/>	<input type="radio"/>
